ORANGE COUNTY CHILDREN'S WATER EDUCATION FESTIVAL SEEKS SPONSORS AND VOLUNTEERS

Two-Day Festival in May Hosts 5,000 Students

FOUNTAIN VALLEY, Calif. – (March 13, 2007) Orange County Water District's (OCWD) Groundwater Guardian Team will present the 11th annual Children's Water Education Festival May 1 and 2, 2007, at Hidden Valley Park in Irvine. The Festival, which is the largest of its kind in the nation, educates Orange County's fourth- and fifth-grade students about water and the environment.

Sponsors, water retailers and municipalities, and presenters from Los Angeles to San Diego make the event possible for local educators and students. Community support of the Festival is essential to its continued success; many students would not be able to attend otherwise. This year's presenting sponsors include Disneyland Resort, the National Water Research Institute (NWRI), Santa Ana Watershed Association (SAWA), J.F. Shea Construction and the County of Orange Watershed & Coastal Resources Division and the Orange County Stormwater Program.

"The event is more than an opportunity to educate students about protecting and preserving our environment, groundwater and drinking water resources," said Dick Zembal, presenter and member of SAWA a Festival sponsor for six years. "It is a chance to plant seeds of knowledge that will help empower our youth to make a difference."

The Festival is a fun, environmental education program designed to teach students about the interdependence of water, soil, plants, trees, animals and humans. Interactive displays and activities feature topics like the water cycle, groundwater and surface water protection, wetlands preservation, recycling, pollution prevention and water treatment, distribution and conservation, and local environmental issues. The Festival also focuses on local water reuse issues and recommends ways students can protect and preserve our local water and environmental resources.

Conducting a Festival of this size requires more than 400 volunteers, staff and presenters, as well as in-kind and cash donations. Many of the schools that attend do not have transportation for field trips and must charter one or more busses. An easy way for individuals in the community to support their neighborhood school is to underwrite transportation costs, generally \$300 to \$500 per bus. Contributions are tax deductible.

CHILDREN'S WATER EDUCATION FESTIVAL ADD 1-1-1

In-kind donations needed for this year's Festival include imprinted t-shirts, crayons, markers, color pencils, beads, string, butcher paper, napkins, cups, spoons, paper table cloths, plates, lemon-lime soda, chocolate sprinkles, drinking straws, a variety of seed packets, soil, and plastic cups with lids.

In addition to cash and in-kind donations, presenters are needed to staff the Festival's interactive booths. Through hands-on activities students learn about the world in which they live and what they can do in their homes, communities and schools to help protect our natural resources. Are you an environmental, groundwater, drinking water or ocean expert? Festival organizers can provide you with the right tools, activities and partners to staff an activity booth. Volunteers also are needed during the two-day festival to help with a range of activities, from staffing registration tables to directing students to their next activity. The Festival is looking for 200 volunteers to work each day.

To sponsor, donate supplies, present an activity or volunteer, contact Natalie Elizondo at (714) 378-3323. Information and registration forms are available at www.ocwd.com/html/cwef.htm.
