Washington, D.C. 20515

The Honorable Congresswoman Steel
1113 Longworth House Office Building
Washington, D.C. 20515

Dear Representatives Correa, Kim, Lowenthal, Porter, and Steel:

Orange County is a national leader in water recycling with the Groundwater Replenishment System, stormwater capture behind Prado Dam and most recently regarding extraction of PFAS from our drinking water. These landmark projects are environmentally superior and have saved Orange County ratepayers billions of dollars from not purchasing expensive, imported water.

PFAS have been detected in the Orange County Groundwater Basin, managed by Orange County Water District (OCWD), and are estimated to cost Orange County communities more than \$1 billion, over 30 years—a cost that could increase. Complicating this cleanup burden, ratepayers are at additional risk from pending PFAS legislation that would effectively abandon the “polluter pays” principle and create a new separate drinking water standard setting process for PFAS chemicals.

I respectfully request that as Congress continues to consider legislative responses to protect our drinking water supplies, you work in support of OCWD’s efforts in garnering an exemption from CERCLA liability for water and wastewater agencies as they properly remove PFAS from drinking water.

Additionally, under current law (Safe Drinking Water Act), the USEPA ensures that public health benefits of new drinking water standards are balanced with the compliance costs that water system ratepayers will ultimately incur. When setting drinking water standards for PFOA and PFOS, we advocate for the USEPA to use this longstanding methodology.

Sincerely,

Doug Chaffee
Vice Chairman, Orange County Board of Supervisors
Supervisor, Fourth District
