Determining COVID-19 Community Levels
The COVID-19 Community Level is determined by the higher of the new admissions and inpatient beds metrics, based on the current level of new cases per 100,000 population in the past 7 days.
[1]Number of new cases in the county in the past 7 days divided by the population in the county (or other administrative level) multiplied by 100,000.
[2]Total number of new admissions of patients with confirmed COVID-19 in the past 7 days divided by the total population in the Health Service Area, multiplied by 100,000.
[3]Percentage of staffed inpatient beds in use by patients with confirmed COVID-19 within the entire Health Service Area (7-day average).
