AGENDA REGULAR MEETING GROUNDWATER REPLENISHMENT SYSTEM STEERING COMMITTEE (A Committee of Orange County Water District and Orange County Sanitation District Directors*) OCWD Boardroom 18700 Ward Street, Fountain Valley Monday, April 11, 2016, 5:00 p.m.

* Orange County Water District Notice: The GWRS Steering Committee (SC) meeting is being noticed as a joint meeting with the Orange County Water District (OCWD) Board of Directors and Orange County Sanitation District (OCSD) Board of Directors for the purpose of strict compliance with the Brown Act and it provides an opportunity for all Directors to hear presentations and participate in discussions. The SC has been delegated limited authority by the OCWD and OCSD Boards of Directors. Agenda items requiring Board approval will be placed on future OCWD and/or OCSD Board meeting Agendas. OCWD Directors receive no additional compensation or stipend as a result of simultaneously convening this meeting.

PLEDGE OF ALLEGIANCE

ROLL CALL

ITEMS RECEIVED TOO LATE TO BE AGENDIZED

RECOMMENDATION: Determine need to take action on item(s) which arose subsequent to posting of the Agenda (ROLL CALL VOTE: Adoption of this recommendation requires two-thirds vote of the Board/Committee, or, if less than two-thirds of the members are present, a unanimous vote)

VISITOR PARTICIPATION

Time has been reserved at this point in the agenda for persons wishing to comment for up to three minutes to the Board of Directors on any item that is not listed on the agenda, but within the subject matter jurisdiction of the District. By law, the Board of Directors is prohibited from taking action on such public comments. As appropriate, matters raised in these public comments will be referred to District staff or placed on the agenda of an upcoming Board meeting.

At this time, members of the public may also offer public comment for up to three minutes on any item on the Consent Calendar. While members of the public may not remove an item from the Consent Calendar for separate discussion, a Director may do so at the request of a member of the public.

CONSENT CALENDAR (ITEM NO. 1)

All matters on the Consent Calendar are to be approved by one motion, without separate discussion on these items, unless a Board member or District staff request that specific items be removed from the Consent Calendar for separate consideration.

1. MINUTES OF PREVIOUS MEETING

RECOMMENDATION: Approve Minutes of the January 11, 2016 GWRS Steering Committee meeting as presented

INFORMATIONAL ITEMS

- 2. GWRS OPERATING BUDGET SUMMARY
- 3. GWRS OPERATIONS UPDATE

- 4. UPDATE ON SP-173 EFFLUENT REUSE STUDY
- 5. QUARTERLY OUTREACH REPORT

DIRECTORS' ANNOUNCEMENTS/REPORTS

GENERAL MANAGERS' REPORT

• Next GWRS Steering Committee meeting – August 8, 2016 @ 5:00 p.m.

DETERMINATION OF ITEMS TO BE PLACED ON CONSENT CALENDAR FOR AGENDIZE FOR THE APRIL 20 OCWD AND APRIL 27 OCSD BOARD MEETING

ADJOURNMENT

In accordance with the requirements of California Government Code Section 54954.2, this agenda has been posted for viewing at the guard shack and in the main lobby of the Orange County Water District, 18700 Ward Street, Fountain Valley, CA not less than 72 hours prior to the meeting date and time above. All written materials relating to each agenda item are available for public inspection in the office of the District Secretary. Backup material for the Agenda is available at the District offices for public review and can be viewed online at the District's website: www.ocwd.com.

Pursuant to the Americans with Disabilities Act, persons with a disability who require a disabilityrelated modification or accommodation in order to participate in a meeting, including auxiliary aids or services, may request such modification or accommodation from the District Secretary at (714) 378-3233, by email at <u>idurant@ocwd.com</u> by fax at (714) 378-3373. Notification 24 hours prior to the meeting will enable District staff to make reasonable arrangements to assure accessibility to the meeting.

As a general rule, agenda reports or other written documentation has been prepared or organized with respect to each item of business listed on the agenda, and can be reviewed at www.ocwd.com. Copies of these materials and other disclosable public records distributed to all or a majority of the members of the Board of Directors in connection with an open session agenda item are also on file with and available for inspection at the Office of the District Secretary, 18700 Ward Street, Fountain Valley, California, during regular business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday. If such writings are distributed to members of the Board of Directors on the day of a Board meeting, the writings will be available at the entrance to the Board of Directors meeting room at the Orange County Water District office.

MINUTES OF MEETING GROUNDWATER REPLENISHMENT SYSTEM STEERING COMMITTEE ORANGE COUNTY WATER DISTRICT & ORANGE COUNTY SANITATION DISTRICT January 11, 2016, 5:00 p.m.

Committee Chair Beamish called the Groundwater Replenishment System Steering Committee meeting to order in the Boardroom at the District office. Following the Pledge of Allegiance to the flag, the OCWD Assistant District Secretary called the roll and reported a quorum.

2016 Committee Members

Annual Reorganization of GWRS Steering Committee Officers

The 2015 GWRS Steering Committee Chair Tom Beamish stated the Committee reorganizes on an annual basis. It was a consensus of the Committee members present to approve the following nominations:

- 2016 GWRS Committee Chair OCWD Director Roger Yoh
- 2016 GWRS Committee Vice Chair OCSD Director John Nielsen

Orange County Water District (OCWD) President Green reported that Director Brandman has been appointed as OCWD Alternate Director No. 2.

Orange County Sanitation District (OCSD) Alternate Director No. 3 Steve Jones arrived during the following discussion.

CONSENT CALENDAR

The Consent Calendar was approved upon motion by Director Green, seconded by Director Beamish and carried [5-0] as follows. [Yes- Green, Anthony, Nielson, Beamish, Ferryman /No-0]

1. Minutes of Previous Meeting

The Minutes of the GWRS Steering Committee meeting held October 13, 2015 are approved as presented.

2. OCWD & OCSD Joint Resolution of Support for the MWD Indirect Potable Reuse Project

Recommended by Committee for approval at January 20 OCWD and January 27 OCSD Board meeting: Adopt resolution supporting the Metropolitan Water District efforts to implement an indirect potable reuse project with County Sanitation District No. 2 of Los Angeles County.

MATTER FOR CONSIDERATION

3. Joint Security Vulnerability Assessment

Director of Water Production/GWRS Mehul Patel advised that the Joint Operating Agreement allows for a security vulnerability assessment every 5 years if significant changes on the joint campus take place. He noted that Pinkerton recently completed the OCSD security vulnerability assessment and staff is recommending that Pinkerton extend its assessment to include a joint campus security vulnerability assessment for an amount not to exceed \$15,000. The Committee then took the following action.

Upon motion by Director Anthony, seconded by Director Ferryman and carried [5-0], the Committee recommended that the OCWD Board at its February 17 Board meeting: Authorize issuance of Agreement to Pinkerton for an amount not to exceed \$15,000 for a joint security vulnerability assessment of the joint OCWD and OCSD Fountain Valley campus as a cost shared item between both agencies. IYes- Green, Anthony, Nielson, Beamish, Ferryman /No-01

INFORMATIONAL ITEMS

4. <u>GWRS Operations Update</u>

Executive Director of Operations Bill Dunivin provided an update on GWRS water production is 3,100 acre feet above the projected target production of 103,000 acre feet. He advised the treatment plant is operating very efficiently and he reported that staff commenced installation of new reverse osmosis membranes in 6 of the original 15 membrane units and the life expectancy of the membrane unit was approximately 5-6 years. These membranes lasted over 8 years.

5. Change Position to Co-Sponsor Proposed Bill to Bottle Advanced Purified Water for Educational Purposes

OCWD General Manager Mike Markus reported that OCWD has supported the introduction of legislation in the past that allowed for the bottling of GWRS water and there was significant resistance and the bill was dropped. He stated that bottling GWRS water for drinking at demonstrations is a key component of education and reaffirms the safety factor of the water treatment purification process. Mr. Markus reported that Water ReUse is looking for an author for new bill to bottle GWRS water and has recommended OCWD participate as a co-sponsor for the legislation. OCWD Director Anthony recommended the GWRS Steering Committee formally invite OCSD to participate as another co-sponsor of the bill. The Committee then took the following action.

Upon motion by Director Anthony, seconded by Director Green and carried [5-0], the Committee recommended that the OCWD Board at its January 27 Board meeting: Invite the Orange County Sanitation District to co-sponsor proposed legislation to bottle GWRS water for educational purposes.

[Yes- Green, Anthony, Nielson, Beamish, Ferryman /No - 0]

6. Update on SP-173 Effluent Reuse Study

OCWD Principal Engineer Sandy Scott-Roberts gave an update on the SP-173 Effluent Reuse study and reported the Final Expansion of GWRS production water will be capable of increased production from 100 million gallons per day (mgd) to 130 mgd. She reported on improvements and expansions needed onsite and the need for increased source water. Ms. Scott-Roberts noted that the GWRS facilities will need 174 mgd of secondary effluent to achieve the 130 mgd water production goal. She discussed the current challenges with recycling the Santa Ana River Intercept (SARI) line source water and then reviewed the initial technical recommendations from the OCSD SP-173 Effluent Reuse Study. Ms. Scott-Roberts stated the draft implementation plan is scheduled to be available in May 2016 and completed in July 2016.

OCSD General Manager Jim Herberg advised that OCSD has initiated plans on diverting more non SARI line water into Plant 1 for GWRS water.

7. Quarterly Outreach Report [Oct - Dec 2015]

OCWD Public Affairs Specialist Gina Ayala provided the fourth quarter outreach report and stated the Public Affairs staff from both agencies meet on a regular basis to review outreach related goals, pertinent legislation issues, brochures, press releases and website issues. She stated the GWRS has won two awards: the IUVA award, "UV Engineering Project of the Year" and the American Membrane Technology Association award, "Membrane Facility of the Year".

DIRECTOR COMMENTS

Director Anthony requested that staff distribute the final draft of the GWRS brochure to the Steering Committee members prior to distribution. He also requested that staff provide updates on the MWD Los Angeles Sanitation project.

VERBAL REPORTS

Mr. Markus stated the OCWD and OCWD joint resolution on today's agenda supports the Metropolitan Water District efforts to implement an indirect potable reuse project with County Sanitation District No. 2 of Los Angeles County.

OCSD Director John Nielsen announced the next GWRS Steering Committee meeting is scheduled for Monday, April 11, 2016 @ 5:00 p.m.

ADJOURNMENT

There being no further business, the meeting was adjourned at 5:38 p.m.

AGENDA ITEM SUBMITTAL

Meeting Date: April 11, 2016

To: GWRS Steering Committee

From: Mike Markus

Staff Contact: W. Dunivin/M. Patel

Budgeted: N/A Budgeted Amount: N/A Cost Estimate: N/A Funding Source: N/A Program/Line Item No.: N/A General Counsel Approval: N/A Project Report Approved: N/A CEQA Compliance: N/A

Subject: GWRS OPERATING BUDGET SUMMARY

SUMMARY

The Joint Exercise of Powers Agreement between OCWD and OCSD governs the operation of the Groundwater Replenishment System (GWRS). This document requires OCWD to prepare and submit its annual operating budget for the GWRS to OCSD.

Attachment(s)

- Water Production Group Work Plan
- FY 2016-17 Department Budget

RECOMMENDATION

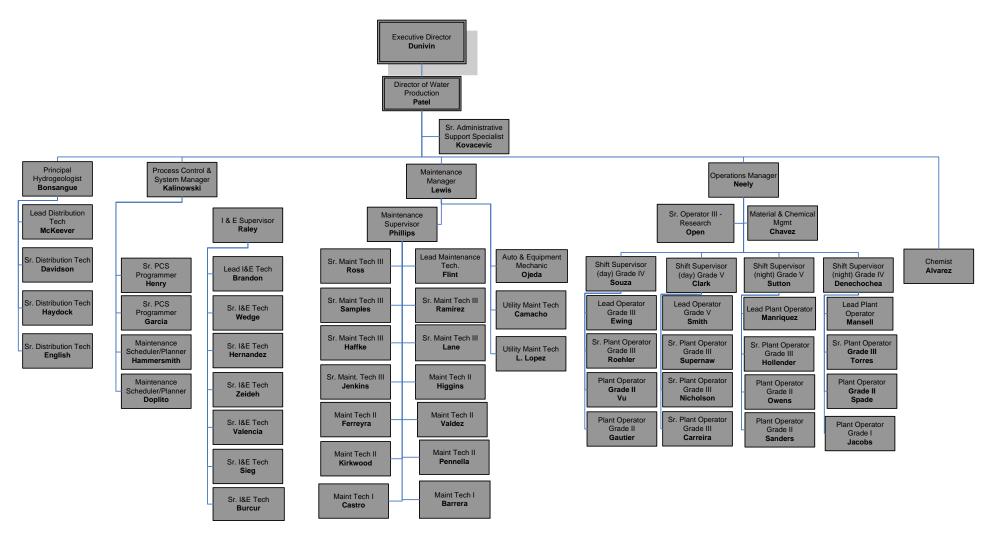

Informational

DISCUSSION/ANALYSIS

The Amended Joint Exercise of Powers Agreement was established to provide details on the obligations of OCWD and OCSD for the operation of the GWRS. As part of this agreement is a requirement to report the OCWD annual budget for operations, maintenance, and capital expenditures for the GWRS to OCSD. A presentation will be given to show details of the GWRS operational budget. In addition, key cost centers and observations on the operational economics will be presented.

Attached to this submittal is a Water Production Group work plan (Attachment A) and a proposed Fiscal Year 16-17 line-item department budget for (Attachment B). This budget will be submitted to the OCWD Board of Directors for its consideration at the April Board meeting.

WATER PRODUCTION/GROUNDWATER REPLENISHMENT SYSTEM

Existing Staff – 64 FTEs

- 1 Executive Director of Operations
- 1 Director of Water Production
- 1 Senior Administrative Support Specialist
- 4 Supervisors (Operations Manager, , Process Control & System Manager and Maintenance Manager)
- 21 Operators (includes Operator III GWRS/Applied Research)
- 14 Maintenance Technicians
- 1 Vehicle and Equipment Technician
- 2 Utility Maintenance Technicians
- 2 Maintenance Scheduler/Planners
- 1 Material and Chemical Management Technician
- 8 Instrumentation & Electrical Technicians
- 2 Process Control System Programmers
- 1 Chemist
- 1 Principal Hydrogeologist
- 3 Senior Distribution Technicians
- 1 Distribution Technician

Mission

Operations and maintenance (O&M) of the GWRS Advanced Water Purification Facility (AWPF), Mid Basin Injection, Talbert Barrier and Green Acres (GAP)

Key Issues for FY 2016-17

- Maximize operation of GWRS processes:
 - With the GWRS initial expansion complete work with the Orange County Sanitation District to make as much water as possible for GWRS production.
 - Goal for 2016-17 production 103,000 acre feet.
 - Send all non-barrier production to Mid Basin Injection Well, Canyon Power, Arctic, Miraloma and Kraemer/Miller basins.
 - Continue to control or reduce the water treatment unit cost by getting the best possible price on electricity, chemicals and spreading the system's fixed costs over the maximum possible production.
 - Optimize operation of new 15 million gallon flow equalization facilities to maximize GWRS production.
- Reduce GWRS processing costs:
 - Continue optimization of MF backwash and cleaning regimes.

- Optimization of RO cleaning regimes by optimizing clearing chemical concentrations and cleaning intervals.
- Optimization of RO pretreatment chemical program, which includes the use of acid and antiscalant to reduce cost and prevent mineral scaling of membranes in the 3rd stage of RO units.
- Optimize use of new RO energy recovery devices in six new RO units to reduce energy cost and/or balance flux performance.
- With the current success of identifying an antiscalant that helps control mineral scaling, continue pilot research to make the final steps toward RO operations at pH 7. Progress to date has saved approximately \$1,800,000 annually. Adjustment from pH 6.9 to 7.0 would further reduce acid usage potentially saving another \$300,000 annually. At the same time, continue to engage manufacturers to develop and evaluate antiscalant formulations toward this goal.
- Work with purchasing to find and procure the best chemical pricing.
- Energy use reduction, load shifting to less expensive nighttime hours where possible, and participation in demand response programs that offset the cost of electricity.
- In the second year of 5 year energy contract that is helping maintain costs of energy.
- Lifespan extension of both MF and RO membranes.
- Continue to replace older MF membranes in phases and planned approach to maintain production and water quality with purchase of 7 cells of MF membranes (684 membranes per cell)
- Continue efforts to maximize UV lamp life to 12,000 hours.
- Continue to replace older RO membranes in phases and planned approach to maintain water quality with the purchase of 3 sets of 1,050 RO membrane elements.
- Manage GWRS assets by:
 - Continued implementation of a robust preventative maintenance program using the Maximo computerized maintenance management system (CMMS).
 - Staff continues to update GWRS the work plans in the CMMS to reflect knowledge gain with 8 years of experience operating the treatment plant.
 - Continued development of staff capabilities to make both minor and major mechanical and electrical repairs on equipment and facilities. These internal capabilities assure fast response, quality repairs and lower cost.

- Continue replacement of 5-7 cells worth of MF membranes based on manufacturing availability from Evoqua.
- Install at least a portion or all of the replacement MF filtrate headers for 24 existing cells. Headers provided as part of settlement agreement with Evoqua in 2015.
- The new Tekken lime system is being optimized for delivery of noncorrosive water into distribution system by effective lime post treatment with confirmatory testing.
- Protection of injection wells by delivery of low particle water.
- Effectively manage the warranty claims and contractor required repairs for the GWRS initial expansion equipment during the one year warranty period.

Account Information	FY 2014-15 Actual	FY 2015-16 Budget	FY 2016-17 Proposed Budget
Salaries and Benefits	8,182,731	8,812,826	9,143,532
Services and Supplies	16,813,241	19,966,434	22,813,590
Total	\$24,995,972	\$28,779,260	\$31,957,122

I FY 2016-17 Major New Initiatives/Programs

- Continue to monitor changes in the MF membrane backwash and cleaning intervals to increase process efficiency and production.
- Engage low-pressure membrane manufacturers to initiate evaluations of alternative products capable of successfully operating on AWPF source water and could be retrofitted into existing infrastructure.
- As the RO membranes age, investigate methods to effectively clean them extend their life to 5 years without reducing salt rejection effectiveness and to control energy use.
- Develop key performance factors that help identify and predict MF and RO membrane end of life conditions.

II Core Activities

- O&M of the 100 mgd GWRS AWPF.
- O&M of the 102 well Talbert Injection Barrier
- O&M of Mid Basin Injection Demonstration well
- O&M of the GAP treatment plant.

- Work with Research and Development on engineering and research aimed at maintaining and optimizing treatment plant performance, production and the Talbert Barrier.
- Administering the joint OCWD & OCSD GWRS Steering Committee meetings.
- Facilitate monthly OCWD and OCSD Joint Operation Committee meetings.

III Non-Core Activities

- Participate in technology transfer on advanced treatment with other water districts, consultants, public agencies, and industry organizations.
- Provide in-kind support as specified by OCWD for participating Water Reuse Research Foundation and Water Research Foundation research projects.
- Provide technical support on various wellhead treatment systems throughout Santa Ana Watershed.
- Provide technical support as needed to the Water Quality, Engineering, Hydrogeology, Public Relations and Health & Regulatory Departments.
- Provide facility maintenance support for OCWD's Fountain Valley facilities.
- Provide support to set up meetings and events.
- Provide instrumentation and electrical support to OCWD's recharge and Prado operations.
- Provide data collection and monitoring support for the Research & Development Department.
- Provide technical updates and participate in meetings with the GWRS Independent Advisory Panel.
- Provide assistance with GWRS tours for the Publics Affairs Department as necessary.
- Provide any required GWRS technical and operational information for outside data requests.

IV Group Goals for FY 2016-17

<u>GWRS</u> –

- 1. Produce up to 103,000 acre feet of water for recharge and injection.
- 2. Continue efforts to control net production cost to less than \$500 per acre foot.
- 3. Continued development of the CMMS for the GWRS and update maintenance requirements for existing and new equipment associated with the GWRS Initial Expansion.

4. Continued development of databases to help staff monitor the individual process performance of the MF, RO and UV treatment systems.

OCSD-

- 1. Continue with joint operations meetings with OCSD plant operations and source control and OCWD staff to ensure both agencies are knowledgeable of issues with each other's operations.
- 2. Coordinated day to day operation and optimization of the new 15 million gallon volume flow equalization storage tanks.

CDPH and the RWQCB -.

1. Prepare an Annual Report on the GWRS operation with District staff and outside consultant.

Talbert Barrier -

1. In conjunction with the barrier staff continue evaluating the corrosivity and injection well fouling propensity of the GWRS finished product water.

V Pending Activities

Continue to develop staff to effectively operate and maintain the GWRS Initial Expansion Facilities.

VI Staff Addition Needed for FY 2016-17

Add one new Senior Plant Operator III to provide support for Applied Research pilot systems operation and for the Research and Development department for GWRS and Forebay operations Optimization.

VII Future Issues

In the next two years, issues the District will need to consider include:

- 1. Optimization of the GWRS AWPF treatment process to lower operational costs, including operation of new flow equalization facilities.
- 2. Continue to optimize MF and RO membrane replacement strategies.
- 3. Process optimization and adjustment of preventative maintenance requirements as necessary.
- 4. Continue forward-looking review of water treatment technologies and opportunities to optimize current GWRS membrane and advanced oxidation treatment processes.
- 5. Continue to monitor energy issues to ensure the lowest possible power expenditures for the GWRS.

6. Support the planning, construction, start-up, operation, maintenance and optimization of the District's future Centennial park mid-basin injection wells.

Subject: GWRS OPERATIONS UPDATE

SUMMARY

Operation of the Groundwater Replenishment System (GWRS) commenced on January 10, 2008. The GWRS operations update will be discussed at Committee.

RECOMMENDATION

Informational

DISCUSSION/ANALYSIS

Since startup in 2008 GWRS continues produce water that meets regulatory requirements. The quality of the secondary effluent received from the Orange County Sanitation District (OCSD) continues to meet all water quality requirements while operating in the nitrified/denitrified (NDN) mode. The GWRS Microfiltration (MF) and Reverse Osmosis (RO) treatment processes have benefited in overall operational improvements as a result of OCSD's efforts to successfully maintain stable operation in the NDN mode.

The average daily average production for the quarter January through March 2016 has been 91.52 mgd. OCSD staff is working to optimize flow availability while OCWD staff works on operational strategies to make as much water as possible.

In addition, OCWD staff has completed installation of new RO membranes in 6 of the 15 original 5 mgd RO units. The membrane life in 12 of the 15 original RO units was greater than 8 years. Replacement of these membranes should result in improved water quality as well as lower RO operating energy costs. It is planned to have the remaining 6 original RO units replaced with new membranes in the next fiscal year 2016-2017.

OCWD has placed an order to replace MF membranes in 7 of the 21 original MF treatment cells. These 21 cells contain originally installed GWRS MF membranes that are now over 8 years old near the end of their useful life. The first delivery of MF membranes occurred at the end of December 2015 and another delivery occurred in January 2016. The remaining 5 deliveries should occur over the next 3 months. As the deliveries arrive from Australia, Water Production staff will begin installation one cell at a time. The installation of these membranes should improve MF water quality while also helping improve cleaning frequencies for the MF

process. Finally, OCWD placed an order for the 14 remaining treatment cells in March 2016 for delivery of all membranes by July 2017 or sooner. It is planned to replace the remaining 14 cells containing original membranes over the next year.

The GWRS effluent production for the months of January through March 2016 is shown in the following tables:

	January 2016 (million gallons)	January 2016 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge, Mid Basin Injection, Artic, and Canyon Power	1,824.02	5,599.73
Seawater Intrusion Barrier	890.45	2,733.69
Total	2,714.47	8,333.42

GWRS EFFLUENT PRODUCTION (January – March 2016)

	February 2016 (million gallons)	February 2016 (acre feet)
Mira Loma, Kraemer/Miller Basin, Recharge, Mid Basin Injection, Artic and Canyon Power	1,919.01	5,891.36
Seawater Intrusion Barrier	820.35	2,518.48
Total	2,739.36	8,409.84

	March 2016 (million gallons)	March 2016 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge, Mid Basin Injection, Artic and Canyon Power	1,966.47	6,037.05
Seawater Intrusion Barrier	919.19	2,821.93
Total	2,885.66	8,858.98

The following graph shows the 2016/2017 fiscal year production to date compared to the fiscal year production target of 103,000 acre feet (af). This target is based on the design annual production for the GWRSIE. As of March 31, 2016 the GWRS production was 77,813.21 af which is 422.50 af above the target production for this date.

Subject: UPDATE ON SP-173 EFFLUENT REUSE STUDY

SUMMARY

Orange County Sanitation District (OCSD) and Orange County Water District (OCWD) staff have started a Effluent Reuse Study known as SP-173 to determine how to achieve flows required for the GWRS Final Expansion.

RECOMMENDATION

Informational.

DISCUSSION/ANALYSIS

OCSD has seen a decrease in the available sewer flows to their Plant No. 1 facility that feeds GWRS. This decrease is a result of the ongoing drought and increased conservation. The GWRS Final Expansion will require 173 mgd to produce 130 mgd. A joint study has been started that will look into where the additional flows required for the final expansion will originate. The study will also look at water quality issues associated with bringing in the additional required flows from OCSD Plant No. 2, including those associated with the Santa Ana Regional Interceptor (SARI) line.

BACKGROUND

The GWRS has the treatment capacity to produce 100 million gallons per day (mgd) of purified water. The GWRS was designed to accommodate a Final Expansion that would increase the treatment capacity beyond the 100 mgd Initial Expansion recently completed. The Environmental Impact Report certified for GWRS evaluated an ultimate facility with a treatment capacity to produce 130 mgd of purified water.

The availability of sufficient quantities of both raw wastewater and secondary treated wastewater from OCSD is an important consideration in planning for the Final Expansion. To produce 130 mgd of purified water, approximately 173 mgd of treated secondary wastewater is needed (based on a 25 percent loss through the GWRS advanced treatment system).

To increase the amount of flow that can be recycled via the GWRS Final Expansion, additional sewage flows need to be conveyed to OCSD Plant No. 1; or treated secondary effluent from OCSD Plant No. 2 needs to be recycled through the GWRS; or

a combination of the two. Flows that are conveyed to OCSD Plant No. 2 for treatment include sewage from the Plant No. 2 tributary area (primarily the western and coastal section of the OCSD service area), flows from SARI, microfiltration and reverse osmosis cleaning flows from GWRS and other minor flows from the GWRS (for example, from sumps and pump cooling water), OCSD Plant No. 1 truck disposal station flows, and some process water flows from OCSD Plant No. 1.

OCSD, with input from District staff, issued a Request for Proposals (RFP) in January 2015 for an Effluent Reuse Study (SP-173). The scope of work for the study includes:

- Hydraulic model for OCSD Plant No. 1 and No. 2
- Plant No. 2 secondary treatment processes water quality study
- SARI and sidestream separate treatment evaluation and concept design
- Plant No. 2 pump stations/conveyance to GWRS evaluation and concept design
- Flow equalization concept design
- GWRS Final Expansion impacts to ocean and OCSD discharge permit
- Potential opportunities for collections diversions and acceptance of urban runoff
- Potential for future water recycling
- Potential for grant funding opportunities to support the GWRS Final Expansion

The results from this study are key to planning the GWRS Final Expansion. OCSD and OCSD will share 50/50 in the study's cost. The consulting firm CDM-Smith with Brown and Caldwell are performing the study. OCSD staff oversee the management of this contract and OCWD staff participate in all major decisions. This includes review of all project deliverable and attendance at all project related meetings.

OCSD began the Effluent Reuse Study (SP-173) in May 2015. The draft report for the study is anticipated to be completed in May 2016 and the final in July 2016. Currently, the most feasible alternative to get available flows to the final expansion has been identified. Technical memo level design and costs are being developed by the consultant as well as a preliminary implementation schedule.

A quarterly update of the study's progress will be given at the GWRS Steering Committee meetings until the study is complete.

Subject: QUARTERLY OUTREACH REPORT [JANUARY-MARCH 2016]

SUMMARY

Outreach for OCWD and the GWRS continues with a major focus to build and maintain support, as well as field media interest and media coverage. The following is a report of activities from January through March 2016.

Attachment(s): 2016 first quarter GWRS news clip report

RECOMMENDATION

DISCUSSION/ANALYSIS

Tour Update

From January through March 2016, OCWD conducted 34 tours for nearly 1,000 guests. Below is a monthly breakdown that shows the number of tours and guests:

Month	# of Tours	# of Guests
January	8	219
February	13	397
March	13	376

Following is a list of groups that toured the GWRS during this quarter:

- Students from Dana Hills High School
- National Science Foundation/NWRI Direct Potable Reuse Workshop attendees
- Members of Orange Canaan Presbyterian Church
- A Chinese delegation accompanied by representatives from MWH Global
- Members of Westminster's Junior Ambassadors Civic Leadership Program
- Moulton Niguel Water District staff
- Members of the International Symposium on Potable Reuse

- Central Valley Farmers, in association with Metropolitan Water District of Southern California
- Members of two public tours
- Students from Rancho Alamitos High School
- Nursing students from California State University, Fullerton (CSUF)
- Two classes from San Clemente High School
- Hydrogeology students from California State University, San Bernardino
- Representatives from Horshiba Instruments
- Students from Godinez High School, in association with OC Coastkeepers
- Two groups of nursing students from California State University, Long Beach (CSULB)
- Representatives from Hampton Road Sanitation District
- Certified Unified Program Agency
- Nursing students from Vanguard University
- Students from Estancia High School
- Residents from Huntington Beach
- University of California, Irvine (UCI) Extension Program
- Dartmouth Alumni
- Students from the University of California, Riverside and Josai University
- Representatives from the World Bank Group
- Students from Edison High School
- Students from Katella High School
- Students from El Modena High School
- The Natural Resources Defense Council Los Angeles Leadership Council
- Attendees of the American Society of Civil Engineers(ASCE)/CSULB conference

Upcoming Tours:

- Huntington Beach High School, April 6 & 7
- Soka University, April 8
- Citrus College, April 8
- CSULB, April 8,15 & 19
- The City of Westminster Water Division, April 12
- UCI, April 21 & June 20
- Assistance League, April 29
- City of Pico Rivera, April 29
- Cal Poly Pomona, May 2 & 3
- West Coast University, May 4 & 16
- CSUF, May 5
- Public tour, May 6 & June 17
- Godinez High School, May 23 & 24
- Jordan High School, May 25
- California Higher Education Sustainability Conference, June 30

Speakers Bureau:

As part of OCWD's standard to forge and maintain long-term, positive and proactive relationships with members of the community and be transparent about its operations and programs, OCWD board members and staff participate, regularly, at community events and speak before civic groups. Below is a listing of speakers bureau engagements. (Note: The GWRS is mentioned in the majority of OCWD speakers bureau presentations.)

- Groundwater Management Districts Association Conference
- UCI Environmental Engineering Seminar Series
- City of Fullerton City Council
- Fullerton Sunrise Rotary
- WateReuse
- Mesa Water District's Water Issues Study Group
- Mid-Basin Injection project meetings
- Surf City Tea
- Morningside Men's Club
- The National Association of Environmental Professionals
- California Council of Land Trusts
- California Water Environment Association
- Anaheim Chamber of Commerce

Upcoming Speakers Bureau:

- Autonetics Rockwell Boeing Retirement Group, April 13
- Fountain Valley Chamber of Commerce, April 15
- Buena Park City Council, April 26
- UCI Earth System Science Annual Industry Networking Night, May 19

Media:

• There were 34 global news hits for the GWRS. This number includes same source stories that ran in multiple media outlets. The news clips report for this quarter is attached.

Other:

- On February 8, a joint press release was issued titled <u>International Water Reuse</u> <u>Leaders Support Los Angeles Water Reliability Project</u>.
- On February 25, a press release was issued entitled <u>Orange County Water and</u> <u>Sanitation Districts \$600 Million Investment in Water Reuse Project Continues to Pay</u> <u>Off.</u>
- On March 17, a joint press release was issued about the awards the GWRS Initial Expansion has received: <u>http://www.ocwd.com/media/4034/gwrsie-awards_final.pdf</u>.
- The updated GWRS technical brochure is posted on the website, http://www.ocwd.com/media/4047/ocwd-technicalbrochure_combined-v23-v40-r.pdf,

and is currently being printed.

- Two booths about the Groundwater Replenishment System were featured at the Children's Water Education Festival. The event hosted nearly 7,000 Orange County Students. Information about the GWRS was also featured in the activity book and program, which was distributed to all attendees.
- On March 31, AB2022, legislation for the bottling of advanced purified water for educational purposes, was heard before the Assembly Committee on Environmental Safety and Toxic Materials. Mehul Patel testified during the hearing in support of the bill. Alicia Dunkin also attended. The bill passed through this committee.
