INFORMATIONAL ITEMS

2. GWRS Operations Update

Executive Director Mehul Patel reported the average daily average production for the quarter July through September 2018 was 62.6 mgd. He advised the lower production rate is due to a plant outage for normal maintenance during this reporting period as well as for a project to add a new lining to a portion of the GWRS pipeline. Mr. Patel stated that the GWRS has run at a reduced production rate of 30 mgd with flow only being sent to the Talbert Seawater Intrusion Barrier since August 22, 2018 due to the addition of a new lining to a portion of the GWRS pipeline. He advised the GWRS pipeline re-lining project will add an epoxy-based liner to repair a deterioration of the existing mortar lining. He stated it is anticipated that the GWRS would be able resume normal production after completion of the project scheduled to be complete by October 3rd.

3. Update on GWRS Final Expansion Project

GWRS Program Manager Sandy Scott-Roberts stated that a revised GWRSFE Project Budget was recently approved by the OCWD Board of Directors on September 19, 2018. She provided an overview of the revised budget and advised that the revision was due to the addition of new treatment equipment required to provide the same level of GWRS treatment with a new water quality source from OCSD's Plant No. 2. Ms. Scott-Roberts provided an update on the status of the project elements and reported that the design on all project components is progressing as anticipated.

4. Quarterly Outreach Report [July- September 2018]

Director of Public Affairs Eleanor Torres stated the report is contained in the packet. She noted OCWD and OCSD received the 2018 Award of Excellence from the Orange County Chapter of the Public Relations Society of America (OCPRSA) for the agencies' "GWRS Bottled Water Campaign."

ADJOURNMENT

There being no further business to come before the Committee, the meeting was adjourned at 5:25 p.m.

Subject: GWRS OPERATIONS UPDATE

SUMMARY

Operation of the Groundwater Replenishment System (GWRS) commenced on January 10, 2008. The GWRS operations update will be discussed at Committee.

RECOMMENDATION

Informational.

DISCUSSION/ANALYSIS

Since startup in 2008 GWRS continues to produce water that meets regulatory requirements. The quality of the secondary effluent received from the Orange County Sanitation District (OCSD) continues to meet all water quality requirements while operating in the nitrified/denitrified (NDN) mode. The GWRS Microfiltration (MF) and Reverse Osmosis (RO) treatment processes have benefited in overall operational improvements as a result of OCSD's efforts to successfully maintain stable operation in the NDN mode.

The average daily average production for the quarter October through December 2018 was 93 mgd.

OCWD completed installation of new RO membranes in three of our 21 RO units in October 2018. These three RO units contained the oldest membranes in the RO system and were installed in 2013. The overall water quality from the RO process remains very good, but this replacement should further improve water quality while also reducing energy demand for these three RO units.

The GWRS effluent production for the months of October through December 2018 is shown in the following tables:

**GWRS EFFLUENT PRODUCTION
(October – December 2018)**

	October 2018 (million gallons)	October 2018 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge, Mid Basin Injection, Artic, and Canyon Power	1,789	5,492
Seawater Intrusion Barrier	926	2,844
Total	2,715	8,336

	November 2018 (million gallons)	November 2018 (acre feet)
Mira Loma, Kraemer/Miller Basin, Recharge, Mid Basin Injection, Artic and Canyon Power	1,985	6,095
Seawater Intrusion Barrier	856	2,628
Total	2,841	8,723

	December 2018 (million gallons)	December 2018 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge, Mid Basin Injection, Artic and Canyon Power	2,209	6,782
Seawater Intrusion Barrier	786	2,414
Total	2,995	9,196

The following graph shows the 2018/2019 fiscal year production compared to the fiscal year production target of 103,000 acre feet (af). As of December 31, 2018 the GWRS Fiscal Year 2018-2019 production total is 41,211 af which is 10,714 af below our target production running average of 51,925 af for the 2018-2019 fiscal year.

SUMMARY

Staff from the Orange County Sanitation District (OCSD) and Orange County Water District (OCWD) are completing the design phase of the GWRS Final Expansion Project. An update on the work progress will be provided.

RECOMMENDATION

DISCUSSION/ANALYSIS

The GWRS Final Expansion Project is the build-out capacity of the GWRS facility that treats secondary effluent from OCSD to drinking water standards for groundwater replenishment water. The current GWRS facility produces 100 MGD of purified water. The build-out treatment capacity increases the water production to a total of 130 MGD. OCSD/OCWD recently completed a joint effluent reuse study (SP-173) which analyzed the project components required to facilitate the GWRS Final Expansion Project. With the study complete, both agencies are proceeding through the design phase of the GWRS Final Expansion Project.

To increase the amount of water produced from the GWRS facility, additional secondary effluent from OCSD must be conveyed to GWRS. With an analysis of average raw wastewater inflows to OCSD's two treatment plants, both OCSD Plant No. 1 and Plant No. 2 secondary effluent is required to meet the 130 MGD GWRS production goal. Therefore, new secondary effluent conveyance facilities are required at OCSD Plant No. 2 to convey the secondary effluent to GWRS. These conveyance facilities include an effluent pump station, a flow equalization tank and a pipeline. In addition, recommendations from the SP-173 study showed that the segregation of the Santa Ana Regional Interceptor (SARI) trunk flows to OCSD Plant No. 2 is feasible as part of the GWRS Final Expansion Project. Currently SARI flows are not permitted to be recycled through GWRS due to the industrial and treatment facility discharges that currently flow in the SARI trunk sewer. Therefore, in addition to the conveyance facilities, the OCSD Plant No. 2 headworks facilities will segregate the SARI trunk flows and treat these flows separately for discharge to the ocean outfall. This project is referred to as the Plant No. 2 Headworks Modification Project.

The Advanced Water Treatment Facility is the GWRS facility made up of the microfiltration, reverse osmosis and UV treatment processes. The AWTF will need to be expanded to treat the additional 30 MGD of secondary effluent to meet the build-out water production goal of 130 MGD total. With all the above considerations, the GWRS Final Expansion Project includes the following projects:

GWRS Final Expansion Project Elements:

- Advanced Water Treatment Facility Expansion
- P2 Effluent Pump Station
- Pipeline Rehabilitation
- P2 Flow Equalization Tanks
- OCSD Headworks Modification

OCWD is responsible for the costs of all the projects listed above for the GWRS Final Expansion Project. However, OCSD will manage the design and construction of the P2 Headworks Modification Project (P2-122). OCSD has entered into an agreement with CDM Smith for the design of the Headworks Modification Project. OCWD has entered into an agreement with Black & Veatch for the design of the remaining four GWRS Final Expansion Projects.

The most current GWRSFE Project budget is shown in Table 1 below.

OCSD/OCWD applied for USBR Title XVI grant for P2-122, the P2 Headworks Modification Project. Staff was notified in November that the application for P2-122 received some of the highest ratings and will be awarded \$1,325,000 in grant funding. OCSD/OCWD staff applied for the second round of USBR Title XVI grants for the P2-122 project as well. Official notification of projects receiving funding in the second round has not been received yet.

In August 2018, OCWD Board of Directors executed a loan agreement with the EPA for a low interest rate WIFIA loan in the amount of \$135 million. Staff has also applied for the State Revolving Fund (SRF) Loan to fund the remaining of the GWRSE Project costs.
