INFORMATIONAL ITEMS

2. GWRS Operating Budget Summary

Executive Director of Operations/GWRS Mehul Patel reminded the Committee that OCWD is required to prepare and submit its annual operating budget for the GWRS to OCSD. He stated the budget will be submitted to the OCWD Board of Directors for its consideration at the April 2019 Board meeting. Mr. Patel reviewed the details of the recommended GWRS operational budget and advised of the joint agency efforts to help control costs.

3. GWRS Operations Update

Mr. Patel reported that the average daily average production for the quarter, January through March 2019, was 97 mgd. He stated that as of March 31, 2019, the GWRS Fiscal Year to Date production total is 67,991-acre feet (af) which is 9,332 af below the target production of 77,323 af for the 18/19 fiscal year.

4. Update on GWRS Final Expansion

GWRS program Manager Sandy Scott-Roberts reported that staff from OCSD and OCWD are completing the design phase of the GWRS Final Expansion Project. She provided an update on the status of project elements and reported that all project components are progressing as anticipated. She reported that in March 2019, the OCWD Board of Directors approved authorization for staff to advertise the GWRSFE Project (Contract 1 which includes the AWTF Improvements, pump station and flow equalization tanks at Plant 2) for construction bid. Ms. Scott-Roberts stated the engineer's estimate for Contract 1 is \$189 million. She advised that staff anticipates awarding the project in Fall 2019 to the responsive low bidder and that construction is estimated to last 3 years with a completion date of first quarter 2023.

Subject: GWRS OPERATIONS UPDATE

SUMMARY

Operation of the Groundwater Replenishment System (GWRS) commenced on January 10, 2008. The GWRS operations update will be discussed at Committee.

RECOMMENDATION

Informational.

DISCUSSION/ANALYSIS

Since startup in 2008 GWRS continues to produce water that meets regulatory requirements. The quality of the secondary effluent received from the Orange County Sanitation District (OCSD) continues to meet all water quality requirements while operating in the nitrified/denitrified (NDN) mode. The GWRS Microfiltration (MF) and Reverse Osmosis (RO) treatment processes have benefited in overall operational improvements as a result of OCSD's efforts to successfully maintain stable operation in the NDN mode.

The average daily average production for the quarter April through June 2019 was 88 mgd. The average production was lower than normal due to maintenance activities at OCSD that limited flow to the GWRS. These projects are expected to be completed this summer and should allow for flows to increase back to normal levels.

The GWRS effluent production for the months of April through June 2019 is shown in the following tables:

**GWRS EFFLUENT PRODUCTION
(October – December 2018)**

	April 2019 (million gallons)	April 2019 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge, Mid Basin Injection, Artic, and Canyon Power	2,044	6,276
Seawater Intrusion Barrier	686	2,105
Total	2,730	8,381

	May 2019 (million gallons)	May 2019 (acre feet)
Mira Loma, Kraemer/Miller Basin, Recharge, Mid Basin Injection, Artic and Canyon Power	1,831	5,621
Seawater Intrusion Barrier	706	2,169
Total	2,537	7,790

	June 2019 (million gallons)	June 2019 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge, Mid Basin Injection, Artic and Canyon Power	1,962	6,024
Seawater Intrusion Barrier	757	2,324
Total	2,719	8,348

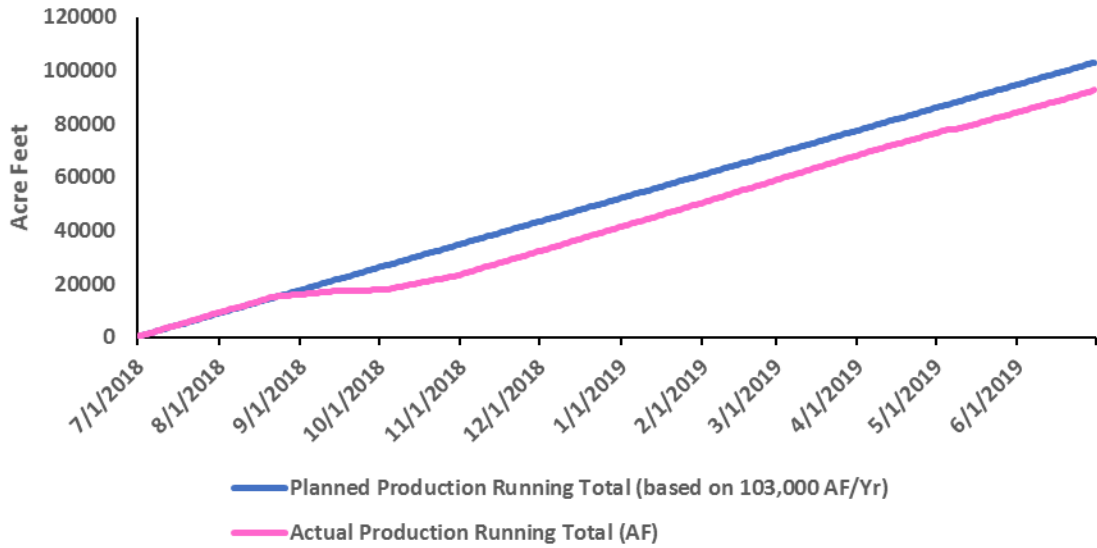

The following graph shows the 2018/2019 fiscal year production compared to the fiscal year production target of 103,000 acre feet (af). As of June 30, 2019, the GWRS Fiscal Year 2018-2019 production total is 92,509 af which is 10,491 af below our target fiscal year production of 103,000 af for the 2018-2019 fiscal year. This shortfall was mainly due to limited production in August and September 2018 for re-lining of the GWRS pipeline as well as reduced flows from OCSD during the months of February to June 2019. As mentioned previously the reduction in flows from OCSD in 2019 were due to maintenance activities at their Plant No. 1 facility.

DISCUSSION/ANALYSIS

The GWRS Final Expansion Project is the build-out capacity of the GWRS facility that treats secondary effluent from OCSD to drinking water standards for groundwater replenishment water. The current GWRS facility produces 100 MGD of purified water. The build-out treatment capacity increases the water production to a total of 130 MGD. OCSD/OCWD completed a joint effluent reuse study (SP-173) in 2016 which analyzed the project components required to facilitate the GWRS Final Expansion Project. With the study complete, both agencies are proceeding through the design phase of the GWRS Final Expansion Project.

To increase the amount of water produced from the GWRS facility, additional secondary effluent from OCSD must be conveyed to GWRS. With an analysis of average raw wastewater inflows to OCSD's two treatment plants, both OCSD Plant No. 1 and Plant No. 2 secondary effluent is required to meet the 130 MGD GWRS production goal. Therefore, new secondary effluent conveyance facilities are required at OCSD Plant No. 2 to convey the secondary effluent to GWRS. These conveyance facilities include an effluent pump station, a flow equalization tank and a pipeline. In addition, recommendations from the SP-173 study showed that the segregation of the Santa Ana Regional Interceptor (SARI) trunk flows to OCSD Plant No. 2 is feasible as part of the GWRS Final Expansion Project. Currently SARI flows are not permitted to be recycled through GWRS due to the industrial and treatment facility discharges that currently flow in the SARI trunk sewer. Therefore, in addition to the conveyance facilities, the OCSD Plant No. 2 headworks facilities will segregate the SARI trunk flows and treat these flows separately for discharge to the ocean outfall. This project is referred to as the Plant No. 2 Headworks Modification Project.

The Advanced Water Treatment Facility is the GWRs facility made up of the microfiltration, reverse osmosis and UV treatment processes. The AWTF will need to be expanded to treat the additional 30 MGD of secondary effluent to meet the build-out water production goal of 130 MGD total. With all the above considerations, the GWRs Final Expansion Project includes the following projects:

GWRs Final Expansion Project Elements:

- Advanced Water Treatment Facility Expansion
- P2 Effluent Pump Station
- Pipeline Rehabilitation
- P2 Flow Equalization Tanks
- OCSD Headworks Modification

OCWD is responsible for the costs of all the projects listed above for the GWRs Final Expansion Project. However, OCSD will manage the design and construction of the P2 Headworks Modification Project (P2-122). OCSD has entered into an agreement with CDM Smith for the design of the Headworks Modification Project. OCWD has entered into an agreement with Black & Veatch for the design of the remaining four GWRs Final Expansion Projects. OCWD is currently complete with the design of Contract 1 – which includes the AWTF Expansion, P2 Pump Station, and the P2 Flow Equalization Tanks. The design for Contract 2 – which is for the Pipeline Rehabilitation Project – is scheduled to be complete at the end of 2019. OCWD is currently out to bid with Contract 1 with an engineer’s estimate of \$189 million and a bid opening date of Tuesday, July 23rd at 2pm.

The most current GWRsFE Project budget is shown in Table 1 below.

(1) Values as of May 2019

OCSD/OCWD applied for USBR Title XVI grant for the P2 Headworks Modification Project in Summer of 2017. Staff was notified in November that the application for P2-122 received some of the highest ratings and was awarded \$1,325,000 in grant funding. OCSD/OCWD staff applied for the second round of USBR Title XVI grants for the P2-122 project in Summer of 2018. Staff was notified that grant funding for the P2-122 project was not awarded in the second round however staff was encouraged to apply for the third round. Therefore, OCSD/OCWD staff are currently finalizing the application for grant funding for the third round of USBR Title XVI grants.

In August 2018, OCWD Board of Directors executed a loan agreement with the EPA for a low interest rate WIFIA loan in the amount of \$135 million. OCWD is also applying for Prop 1 grants from the IRWM grant program managed by the California Department of Water Resources. OCWD was notified that we were preliminarily selected for funding however the funding amount has not yet been confirmed. OCWD is also slated to receive the remaining funds required from the State Revolving Fund (SRF) Loan.
