AGENDA REGULAR MEETING

GROUNDWATER REPLENISHMENT SYSTEM STEERING COMMITTEE

(A Committee of Orange County Water District and Orange County Sanitation District Directors*)

OCWD Boardroom 18700 Ward Street, Fountain Valley

Monday, April 13, 2015, 5:00 p.m.

* Orange County Water District Notice: The GWRS Steering Committee (SC) meeting is being noticed as a joint meeting with the Orange County Water District (OCWD) Board of Directors and Orange County Sanitation District (OCSD) Board of Directors for the purpose of strict compliance with the Brown Act and it provides an opportunity for all Directors to hear presentations and participate in discussions. The SC has been delegated limited authority by the OCWD and OCSD Boards of Directors. Agenda items requiring Board approval will be placed on future OCWD and/or OCSD Board meeting Agendas. OCWD Directors receive no additional compensation or stipend as a result of simultaneously convening this meeting.

PLEDGE OF ALLEGIANCE

ROLL CALL

ITEMS RECEIVED TOO LATE TO BE AGENDIZED

RECOMMENDATION: Determine need to take action on item(s) which arose subsequent

to posting of the Agenda (ROLL CALL VOTE: Adoption of this recommendation requires two-thirds vote of the Board/Committee,

or, if less than two-thirds of the members are present, a

unanimous vote)

VISITOR PARTICIPATION

Time has been reserved at this point in the agenda for persons wishing to comment for up to three minutes to the Board of Directors on any item that is not listed on the agenda, but within the subject matter jurisdiction of the District. By law, the Board of Directors is prohibited from taking action on such public comments. As appropriate, matters raised in these public comments will be referred to District staff or placed on the agenda of an upcoming Board meeting.

At this time, members of the public may also offer public comment for up to three minutes on any item on the Consent Calendar. While members of the public may not remove an item from the Consent Calendar for separate discussion, a Director may do so at the request of a member of the public.

CONSENT CALENDAR (ITEM NO. 1)

All matters on the Consent Calendar are to be approved by one motion, without separate discussion on these items, unless a Board member or District staff request that specific items be removed from the Consent Calendar for separate consideration.

1. MINUTES OF PREVIOUS MEETING

RECOMMENDATION: Approve Minutes of the January 12, 2015 GWRS Steering

Committee meeting as presented

END OF CONSENT CALENDAR

- 2. GWRS INITIAL EXPANSION CONSTRUCTION UPDATE
- 3. GWRS OPERATIONS UPDATE
- GWRS OPERATING BUDGET SUMMARY
- 5. UPDATE ON OCSD FLOW AVAILABILITY
- 6. QUARTERLY OUTREACH REPORT [JANUARY MARCH 2015]

DIRECTORS' ANNOUNCEMENTS/REPORTS

GENERAL MANAGERS' REPORT

Next GWRS Steering Committee - Monday, July 13, 2015 @ 5:00 p.m.

DETERMINATION OF ITEMS TO BE PLACED ON CONSENT CALENDAR FOR APRIL 15 OCWD BOARD MEETING

ADJOURNMENT

In accordance with the requirements of California Government Code Section 54954.2, this agenda has been posted in the main lobby of the Orange County Water District, 18700 Ward Street, Fountain Valley, CA not less than 72 hours prior to the meeting date and time above. All written materials relating to each agenda item are available for public inspection in the office of the District Secretary. Backup material for the Agenda is available at the District offices for public review and can be viewed online at the District's website: www.ocwd.com .

Pursuant to the Americans with Disabilities Act, persons with a disability who require a disability-related modification or accommodation in order to participate in a meeting, including auxiliary aids or services, may request such modification or accommodation from the District Secretary at (714) 378-3233, by email at jdurant@ocwd.com by fax at (714) 378-3373. Notification 24 hours prior to the meeting will enable District staff to make reasonable arrangements to assure accessibility to the meeting.

As a general rule, agenda reports or other written documentation has been prepared or organized with respect to each item of business listed on the agenda, and can be reviewed at www.ocwd.com. Copies of these materials and other disclosable public records distributed to all or a majority of the members of the Board of Directors in connection with an open session agenda item are also on file with and available for inspection at the Office of the District Secretary, 18700 Ward Street, Fountain Valley, California, during regular business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday. If such writings are distributed to members of the Board of Directors on the day of a Board meeting, the writings will be available at the entrance to the Board of Directors meeting room at the Orange County Water District office.

2015 GWRS Steering Committee Members

OCWD Alternates	
Denis Bilodeau	OCWD Director (No. 1)
Jan Flory	OCWD Director (No. 2)
Dina Nauven	OCWD Director (No. 3)

MINUTES OF MEETING

GROUNDWATER REPLENISHMENT SYSTEM STEERING COMMITTEE ORANGE COUNTY WATER DISTRICT & ORANGE COUNTY SANITATION DISTRICT January 12, 2015 @ 5:00 p.m.

Chairman Yoh called the Groundwater Replenishment System Steering Committee meeting to order in the Boardroom at the District office. Following the Pledge of Allegiance to the Flag, the Secretary called the roll and reported a quorum as follows.

2015 Committee Members

Roger Yoh OCWD Director (No. 1)
Philip Anthony OCWD Director (No. 2)
Cathy Green OCWD Director (No. 3)
Tom Beamish OCSD Director (No. 1)
Jim Ferryman OCSD Director (No. 2) (arrived at 5:05 p.m.)
John Nielsen OCSD Director (No. 3)

Alternates

Denis Bilodeau OCWD Director (No.1) (arrived at 5:27 p.m.)
Jan Flory OCWD Director (No. 2) (not present)
Dina Nguyen OCWD Director (No. 3) (not present)
Lucille Kring OCSD Director (No. 1) (arrived at 5:20 p.m.)

Greg Sebourn OCSD Director (No. 2)

Steve Jones OCSD Director (No. 3) (arrived at 5:10 p.m.)

Others

Mike Markus, OCWD

Mehul Patel, OCWD

Bill Hunt, OCWD

Jim Herberg, OCSD

Kathy Millea OCSD

Cindy Murra, OCSD

Judy-Rae Karlsen, OCWD Rich Ten Bosch, James Clark - Black & Veatch

John Kennedy, OCWD Luke Wendel - Parsons

Bill Dunivin, OCWD Curt Horner, Damon Yates - McCarthy Building Co.

Gina Ayala, OCWD Debra Burris - DDB Engineering

Sandy Scott-Roberts, OCWD

Annual Reorganization of GWRS Steering Committee Officers

Chairman Yoh reported the Committee reorganizes on an annual basis. It was a consensus of the Committee members present to approve OCSD Director Tom Beamish as Chairman and OCWD Director Roger Yoh as Vice Chairman of the 2015 GWRS Steering Committee. Chairman Beamish then announced the new Alternate Directors:

- Lucille Kring OCSD Alternate No. 1
- Dina Nguyen OCWD Alternate No. 3

CONSENT CALENDAR

The Consent Calendar was approved upon motion by Director Green, seconded by Director Nielsen and carried [6-0] as follows.

[Yes- Beamish, Yoh, Anthony, Green, Nielson, Sebourn /No-0]

1. Minutes of Previous Meeting

The Minutes of the GWRS Steering Committee meeting held October 13, 2014 are approved as presented.

INFORMATIONAL ITEMS

OCSD Director Ferryman arrived at 5:05 p.m. and OCSD Director Jones arrived at 5:10 p.m. during the following discussion.

2. GWRS Initial Expansion Construction Update

GWRS Project Manager Mehul Patel reported the GWRS construction contract was awarded to McCarthy Building Companies, Inc. on October 20, 2011 with a construction completion date of October 18, 2014. He noted that due to authorized time extensions, the completion date has been extended to April 24, 2015 and the contractor is focusing on the completion of construction in the lime area and beginning start-up of the microfiltration (MF), reverse osmosis (RO), and Flow Equalization process areas. Mr. Patel indicated the final completion of the project would not likely occur until the end of June 2015 with substantial completion by the end of April. He advised the Construction Management Monthly Progress Report for November 2014 compiled by Parsons and the Change Order Reports are in today's packet.

3. GWRS Operations Update

Director of Operations Bill Dunivin reported OCWD and OCSD staff continue to work together to develop a strategy to bring more water into OCSD's Plant 1 for the pending commissioning and startup of the GWRS Initial Expansion Project. He advised the GWRS plant is currently behind on production rates however OCSD will start increasing flow into Plant 1 during January 2015 in an effort to stabilize the treatment process prior to commissioning the new MF and RO process.

OCSD Director Lucille Kring arrived at 5:20 p.m. and OCWD Director Bilodeau arrived at 5:27 p.m. during the following discussion.

4. Update on OCWD P1-101 Sludge Dewatering and Odor Control Project

OCSD Planning Manager Kathy Millea presented an update on the OCSD P1-101 Sludge Dewatering and Odor Control Project that commenced construction in January 2013. She reported the project is no longer expected to have an impact on the amount of flow available to the GWRS Initial Expansion project. However, OCSD has observed a significant decrease in sewer flows to both OCSD plants that will limit flow availability to the GWRS Initial Expansion project.

5. Quarterly Outreach Report [October – December]

Principal Communications Specialist Gina Ayala reported on OCWD outreach projects and advised the Committee that the focus of public outreach is to build and maintain support for the project as well as encourage media interest and increase media coverage. She briefly reviewed the hallway project, Speaker's Bureau, tours, media coverage, and the new OCWD website. Ms. Ayala stated the detailed report is in today's packet. Ms. Ayala responded to questions and reported on the demographics for visitors and the upcoming dedication of the GWRS Initial Expansion project.

DIRECTORS' ANNOUNCEMENTS/REPORTS

Chairman Beamish reported the following schedule for 2015 GWRS Steering Committee meetings:

- Monday, April 13, 2015 @ 5:00 p.m.
- Monday, July 13, 2015 @ 5:00 p.m.
- Monday, October 12, 2015 @ 5:00 p.m.

ADJOURNMENT

here being no further business, the meeting was adjourned at 5:55 p.m.
Tom Beamish, Chair

Subject: GWRS INITIAL EXPANSION CONSTRUCTION UPDATE

SUMMARY

A Notice to Proceed was issued on October 20, 2011 to McCarthy Building Companies, Incorporated for construction of the Groundwater Replenishment System (GWRS) Initial Expansion project. The project construction contract was in the amount of \$115,089,998. Attached is the Construction Management Monthly Program report for February 2015.

Attachment(s):

Parsons Construction Management Report (February 2015)

• Change Order Report

RECOMMENDATION

Informational.

DISCUSSION/ANALYSIS

The GWRS Initial Expansion project increases the GWRS treatment capacity from 70 million gallons per day (mgd) to 100 mgd. Additionally, two flow equalization tanks will be constructed on Orange County Sanitation District property to store excess daytime wastewater flows and feed to GWRS at night. Construction is now underway on the project.

The construction contract was awarded to McCarthy Building Companies, Incorporated with a Notice to Proceed dated October 20, 2011. The original construction contract end date was October 18, 2014. Due to authorized time extensions the revised contractual end date is now April 24, 2015. The contractor is currently focused on finishing completing start-up of the Microfiltration (MF), Reverse Osmosis (RO), and Flow Equalization process areas.

Attached is the Construction Management Monthly Progress Report for February 2014 compiled by Parsons. Parsons is the construction manager for the project and each month they prepare a summary report on the status of the construction for the GWRS Initial Expansion project. Also attached is a Change Order Report showing a summary of the amounts for all Change Orders issued to date for construction of the GWRS Initial Expansion project.

The construction progress and contract status information to be presented is based upon information shown in the Construction Management Monthly Progress Report from Parsons.

SAFETY

Reporting period is February 2015

- Regulatory Agency Visits occurring in period: = 0
 - There were no Cal-OSHA safety visits made to the construction project site during the month of February.
- As of February 28, 2015, the project completed 1228 days. In June 2013, both the Contractor and the Construction Manager had an employee injured. There were no safety incidents in February 2015.
- Operational incidents:
 - On February 19, the plant shutdown for half a day so that the Contractor could test and place the new backwash supply pump in service.

-3-File: 320.05

CONSTRUCTION CONTRACTOR ACTIVITY/ KEY ACCOMPLISHMENTS IN REPORTING PERIOD

- ▶ MF Facility: MF Backwash supply pump was placed into service February 19. Repair and replacement of membranes continued cell-by-cell in Train C.
- Area 255 RO Transfer and MF Backwash Pumping: The ne MF backwash Supply Pump was placed into service February 19, 2015, and witness testing of the uncoupled RO Transfer Pump commenced February 25, 2015.
- ➤ **RO Building:** Witnessed RO System component testing was substantially completed in February. Unit F03 completed orifice testing and was loaded with membranes February 20 and 21. Unit F02 sequence testing was underway at the end of February 2015.
- ➤ UV Area: New UV reactors were on-line in February for the fouth month of a 90-day acceptance test. Communications failures were addressed February 4, 2015, and have not occurred since. However, a problem with new Train M flow transmitter surfaced in February and Train M has been taken off-line. The instrument was sent too manufacturer for troubleshooting. The UV System Supplier has been notified that performance testing cannot be considered complete until the new reactors can run incident free for 30 days.
- > **SEFE Construction**: Final mechanical and electrical work continued in the SEFE Pump Station in February. Pre-operational testing is set to begin in March.
- **Decarb Area 710:** The new Decarbonator valves were adjusted by the manufacturer in February.
- Lime Feed System Area 730: The final two new lime slakers were tested and put in service in February 2015. The new Lime Saturator and dosing pump are scheduled to commence testing in March.
- > **SBS:** The new SBS pump and Flush Pump were placed in service in February to support flushing of membranes in the new RO Units.
- Construction Schedule: The Contractor was directed to incorporate the Startup Recovery Schedule in the January 2014 Construction Schedule Update. The new schedule established a February 9, 2015 Final Completion Date. Allowance was made for final contract acceptance by April 24, 2015.

In February 2015, the contract was extended 32 days for changes to RO System testing requirements. The revised contract completion date is May 26, 2015.

The February 2015 schedule update shows a 15 day slip from the January Update. The final acceptance date is now forecast as July 1, 2015, thirty-five (35) days beyond revised contract time. See Schedule Concerns/Issues, below.

File: 320.05 -4- **PARSONS**

UPCOMING WORK AND CHALLENGES

- ➤ MF: Train C membrane integrity testing and sequence testing of control valves will continue.
- RO: Sequence testing, membrane loading and placing Train F in service.
- LIME: Pre-operational testing should commence.
- DECARB: Witness testing should begin in March.
- UV: New UV Trains are in their 90 day acceptance testing period. Train M flow transmitter correction and final communication terminations for power monitors and sump pump will substantially complete the Area.
- PWPS: Uncoupled witness testing and manufacturer's certification of installation should commence.
- BULK CHEMICALS: SHC and first phase of Sulfuric Acid improvements should be tested and placed in operation.
- > SEFE AREA: Pre-operational testing should commence.

SIGNIFICANT SCOPE ITEMS/ISSUES

With most systems in testing and startup mode, equipment and controls issues are uncovered.

RO Feed Pump Vibration: During witnessed testing of RO Feed Pumps in January and early February 2015, four of six new pumps tripped out on high vibration at speeds on the ranging from 80% to 90% of maximum. The pump manufacturer took readings in early February and has yet to issue and findings, and again after third-party testing.

The Contractor conducted third-party testing February 19 through 21, 2015 from which preliminary findings were transmitted March 2, 2015. One of the four pumps, Unit F01, has improved with run-in and currently meets acceptance criteria.

The Contractor has stated that a final report will be prepared after meetings among the Contractor, Pump Manufacturer and Third-Party Tester are conducted.

➤ Plant Shutdowns: The contract limits the total duration of full plant shutdowns to 28 days. As of the end of February 2015, 38 shutdown days have been attributed to Contractor activities. The Contractor has identified two remaining plant shutdowns to complete the work.

File: 320.05 -9- **PARSONS**

QUALITY ASSURANCE/QUALITY CONTROL

OPEN NON-COMPLIANCES (NCN'S)

- NCN #29 was issued 10/15/13 for failure to install a test tee on the new Threshold Inhibitor pressure gauge. The Contractor responded 10/16/13, refuting the NCN by reference to a P&ID Drawing. This refutation was rejected 10/22/13, based upon multiple specification requirements and a Detail Drawing that requires testing tees whether shown on individual system P&ID Drawings or not. The District determined that the stipulated test tees need only apply in chemical process areas. Bulletin #57 was issued December 16, 2013, to clarify the requirement. The NCN was closed February 13, 2015.
- NCN #36 was issued 12/9/13, for incomplete/incorrect submittal data in order to highlight an incompatibility between the control valve actuators installed and their communication interface requirement (Foundation Fieldbus). The Contractor indicated in May 2014 that they could not identify how to provide the specified communication interface. District staff researched Phase 1 records, identified the fix and provided the Contractor with a contact in June 2014. The reworked valves were installed in October 2014. However, upon testing in November, one of the valves actuators in question failed from apparent moisture damage.
- NCN #40 was issued 1/13/14, for damage to existing electrical raceway on the east side of the 910 Switchgear Building.
- NCN #45 was issued 4/24/14, for inadequate compaction of AC pavement. On 5/29/14, the Design Engineer issued a disposition lowering the compaction requirement and requesting additional testing. The MF area of rework was corrected in August 2014. The remaining issues of contention are four road crossings from the temporary dewatering discharge line.
- NCN #47 was issued 5/14/14 for failed insulation kits on a number of flanged joints in the SEFE area. Determination of the corrective action was made by the Contractor in September 2014. The NCN was closed February 27, 2015.
- NCN #49 was issued 7/17/14 for out-of-spec nuts, bolts and gaskets in RO system piping. The Contractor commenced repairs in September 2014. The NCN was closed February 18, 2015.
- NCN #55 was issued 9/24/14 after it was determined that RO skylight attachment details were not per approved design.
- NCN #56 was issued 12/15/14 after it was discovered that new chemical storage tank level gauges do not match the approved submittal details.
- NCN #57 was issued 1/27/15 when it was discovered that a Cathodic Protection Test Station had been paved over.
- NCN #58 was issued 2/18/2015 when the extent of flooding from misfit RO permeate dump piping became apparent.

Contractor Billings and Current Forecast

SCHEDULE MANAGEMENT

On January 27, 2014, the Contractor submitted the Schedule Update incorporating the agreed Startup Recovery Schedule. This January 2014 Update was accepted as the current project baseline schedule. In February 2015, 32 calendar days were added to contract time for extended RO testing requirements.

CONTRACT SCHEDULE MILESTONE

Notice of Award	09/07/11
Notice to Proceed	10/20/11
Time of Completion	1095 Calendar Days
Original Contract Completion Date	10/18/14
Authorized Time Extensions	220 Calendar Days
Current Contract Completion Date	05/26/15
Days Behind Current Contract Completion Date per February 2015 Update	35 Calendar Days
Contractor's Anticipated Completion Date per February Update	07/01/15

CRITICAL PATH

Based on the Contractor's February 2015 Schedule Update all remaining project areas are schedule critical, the project's longest path remains as follows:

- ➤ RO Systems Startup, and Overall Plant Startup and Testing Non-Work Day Time Adjustments:
 - Inclement Weather Days Requested to Date: 9 Granted: 2
 - Non-working days requested by Contractor and approved by CM Team this period: 0.

^{*}Field Change Order # 2 slipped Interim Milestone No 1 by 59 days due to severe flooding in Southeast Asia which damaged Emerson manufacturing facilities in Thailand.

^{**} CM letter granting 3 day extension issued 04/11/12

^{***} Time Extensions (FCO#): (11.1)–12 days; (75)–72 days; (253)-104 days; (448)-32 days.

SCHEDULE CONCERNS/ISSUES

Schedule Recovery: Discussion of schedule recovery involving startup planning began in May 2013. The Contractor presented a preliminary recovery schedule in November 2013, based on a Data Date of October 10, 2013. A meeting to discuss the schedule was conducted on December 19, and a consensus achieved.

FCO 0253 Global Time Adjustment was issued January 29, 2014, adding 104 calendar days of contract time to April 24, 2015. The adjustment was made in consideration of all unforeseen conditions and changes to that date, and committed the Contractor to a 29 calendar day recovery from the December 2013 schedule. The new schedule includes a final completion target date of February 9, 2015, that if achieved, would have recovered an additional 74 calendar days.

The agreed startup schedule compressed testing and commissioning such that multiple areas would be simultaneously in play. Further schedule slip has compounded the need for resources to manage and monitor concurrent startups in multiple areas. Construction productivity, deficiencies, unrecognized complexities in testing, and changes to the design have all contributed to schedule slippage. Beginning with the September 2014 Schedule Update, the Contractor has reported project completion beyond contract time.

Since the April 2014 Schedule update the forecast Final Completion date slipped 143 days to July 1, 2015. Substantial Completion is now forecast for June 1, 2015.

In February 2015, thirty-two (32) calendar days were added to contract time under Change Order No. 21, bringing final completion to a date of May 26, 2015. The time extension was based on a time impact analysis for changes to hydraulic pressure testing requirements that began in late September 2014 and ended in December 2014.

Current delays are resulting from issues discovered in testing.

The remaining major process areas of concern are addressed below:

➤ MF: Train E 21-day Acceptance Testing Completed September 11, 2014.

The new BackwashWaste Pump was placed into operation January 21, 2015.

The Backwash Supply Pump was tested February 19, 2015, and placed into operation.

Train C pre-operational testing began November 2015. New Train C membranes were installed and lain up prior to the holidays. MF Train C witnessed testing commenced January 13, 2015. Train C membrane quality issues came to the

File: 320.05 -14- **PARSONS**

fore in February 2015, with replacements and pinning repairs continuing throughout the month.

- ➤ RO: The February Schedule Update indicates that all new RO Units will be online in early May 2015, a slip of two weeks from the January Update. However, high vibration issues with the G-Train pumps introduce significant uncertainty in the operational completion of the G-Train.
 - Progress on the F-Train is good, with membrane loading of Unit F03 having been completed February 23, and Unit F02 Sequence Testing completing February 27, 2015.
- ➤ **Lime:** The Lime Feed System startup was successfully completed in two phases, culminating in February 2015. The new Lime Saturator C, new lime dosing pump and the polymer skid remain to be commissioned.
- Decarb Area: The Decarbonator Area startup is currently scheduled to begin in March 2015.
- > **SEFE:** SEFE Tanks and Pump Station startup is forecast for mid-April.
- Overall Plant Startup: The February 2015 Schedule Update forecasts Overall Plant Startup beginning mid - May 2015, after completion of second RO Train and SEFE startups.

File: 320.05 -15- **PARSONS**

CHANGE MANAGEMENT

New This Period:

RFP 0316 was issued to add conduit between two flow elements and their transmitters in SEFE Area.

RFP 0317 was issued add an Air Vacuum and Relief Valve on the 78-inch UVP Pipe at DeCarb.

RFP 0318 was issued to modify pipe supports at the RO CIP.

RFP 0319 was issued to add conduit and wire for the new Lime Saturator I/O.

RFP 0320 was issued to add wiring for the new leak detector on the SBS system.

FCO 00355.1 was issued for modifying existing UV Stairs under T&M FCO 00355.

FCO 00398.1 was issued for replacing PVC RO FLW spools with stainless steel under T&M FCO 00398.

FCO 00409.1 was issued to change the RO Dump Valve controls to 120 VAC under T&M FCO 00409.

FCO 00411.1 was issued for rewiring RO control panel feeders under T&M FCO 00411.

FCO 00427.1 was issued for relocating a seismic cable tray tie that interfered with the ROTP under T&M FCO 00427.

FCO 00438 was issued for reduced AC removals, per RFP 0077.

FCO 00439 was issued to add two PRVs at the Plant 1 Bleach Station, per RFP 0313.

FCO 00440 was issued to add condensate drains on UV and SEFE PS roofs, per RFP 0315.

FCO 00441 was issued to replace a circuit breaker in BUSE 480-MCC-0040, per RFP 0310.

FCO 00442 was issued for SEFE grading and paving revisions, per RFP 0285.1.

FCO 00443 was issued to replace the pressure instruments for the RO CIP Cartridge Filters, per RFP 0301.

FCO 00444 was to modify the MF Train C basement lighting circuits, per RFP 0312.

FCO 00445 was issued to modify the easterly sump pump panel in MF Train C basement, per RFP 0314.

FCO 00446 was issued to add Remote Displays for SEFE Pump Station control valves, per RFP 0304.

FCO 00447 was issued to modify the Lime Sat catwalk handrail, per RFP 0307.

FCO 00448 was issued for additional hydro-testing of RO concentrate piping, per RFP 0286.

FCO 00449 was issued to add conduit between two flow elements and their transmitters in SEFE Area, per RFP 0316.

FCO 00450 was to modify signal and power arrangements for MF Train C sampling instruments, per RFP 0309.

FCO 00451 was issued for stainless steel HVAC support hardware.

FCO 00452 was issued for installing Class 2 bolts on RO piping.

FCO 00453 was issued for modify piping at the new lime dosing pump, per RFI 1242.

FCO 00454 was issued at T&M to add temporary support at one RO CIP mixer.

Pending Issues: Design changes (RFPs) are pending for:

None

Summary of Pending Changes

No.	Description	Cost
Request	s For Proposal (RFP)/Requests For Change (RFC)	*ROM Value
0216	Modify Sulfuric Acid System, RFI 0921, RFI 0923	\$10,000
0288	Modify SEFE Tank Drain Control Strategy	\$37,000
0306	Modify SEFE Pump A04 & A05 TSH, RFI 1216	\$6,000
0319	Add Lime Sat C i/o Cables, RFI 1247	\$16,000
0320	Add SBS Leak Detection Probe, RFI 1211.1	\$10,000
Misc.	Allowance for indirect costs	\$156,000
		\$235,000

ENGINEERING

Significant Engineering Items in February 2015:

- During February 2015, 5 new RFPs and 16 FCO's were issued to the Contractor. One RFP was in design as of February 27, 2015.
- > RFIs in February were up 4 from January, at 21 for the month.
- > Submittal volume in February was up 19 from January, at 38 received. The number of submittals in review at the end of the month was 11.

RFI's Received to Date	RFI's Returned to Date	RFI's In Review
1397	1393	4

Submittals Received to Date	Submittals Returned to Date	Submittals Pending Review
1484	1473	11

Major Submittals processed this period:

- ➤ The Construction Schedule Update for January 2015 was approved with comment.
- > The Lime Saturator C Startup Plan was reviewed and returned with comments.
- The quarterly update of the Contractor's electronic red-line drawings continued in review.

AGENDA ITEM SUBMITTAL

Meeting Date: April 13, 2015 Budgeted: N/A

To: GWRS Steering Committee

Budgeted Amount: N/A
Cost Estimate: N/A

Funding Source: N/A

From: Mike Markus/Jim Herberg Program/Line Item No.: N/A

General Counsel Approval: N/A

Staff Contact: W. Dunivin Project Report Approved: N/A

CEQA Compliance: N/A

Subject: GWRS OPERATIONS UPDATE

SUMMARY

Operation of the Groundwater Replenishment System (GWRS) commenced on January 10, 2008. The GWRS operations update will be discussed at Committee.

RECOMMENDATION

Informational

DISCUSSION/ANALYSIS

Since startup in 2008 GWRS continues produce water that meets regulatory requirements. The quality of the secondary effluent received from the Orange County Sanitation District (OCSD) continues to meet all water quality requirements while operating in the nitrified/denitrified (NDN) mode. The GWRS, Microfiltration (MF) and Reverse Osmosis (RO) treatment processes have benefited in overall operational improvements as a result of OCSD's efforts to successfully maintain stable operation in the NDN mode.

OCWD and OCSD staffs continue to work together on the plan to bring more water into OCSD's Plant 1 for the pending commissioning and startup of the GWRS Initial Expansion Project. OCSD has been steadily making adjustments for increasing flow into Plant 1 during January through March of 2015 in an effort to stabilize the treatment process before commissioning the new MF and RO process.

The GWRS effluent production for the months of January through March 2015 is shown in the following tables:

	January 2015 (million gallons)	January 2015 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge and Canyon Power	1,065.59	3,271.35
Seawater Intrusion Barrier	923.49	2,835.11
Total	1,989.08	6,106.46

	February 2015 (million gallons)	February 2015 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge and Canyon Power	1,006.64	3,088.44
Seawater Intrusion Barrier	894.76	2,746.92
Total	1,901.40	5,835.36

	March 2015 (million gallons)	March 2015 (acre feet)
Mira Loma, Kraemer/Miller Basin Recharge and Canyon Power	1,130.76	3,466.55
Seawater Intrusion Barrier	923.66	2,835.60
Total	2,054.42	6,302.15

The following graph shows the trend of fiscal year production to the fiscal year targeted production of 80,000 acre feet (af) for the 2014/2015 fiscal year. As of March 31, 2015 the GWRS production was 54,017 af which is -6,038 af below the target production of 60,055 af for this time period.

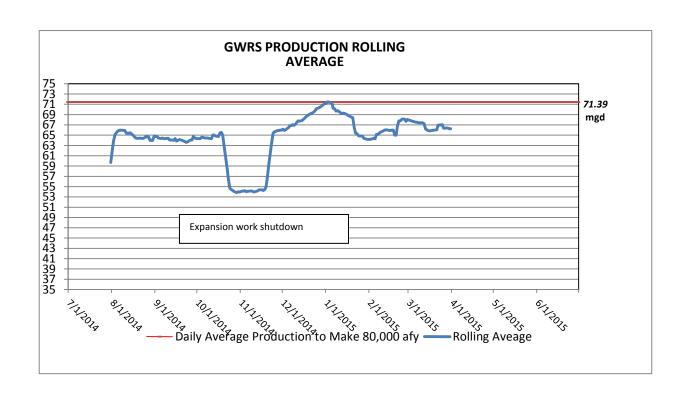

Back on December 3, 2014 staff began operating the standby RO train to add to production. The ability to use this train is possible because two of the new MF cells are operational and the added UV for the expansion is on line. Operating the standby or train has added approximately 3.5 million gallons per day (mgd) to the daily production. Overall production this fiscal year production has been impacted by GWRS initial expansion work, OCSD flow reduction to make repairs to head works and other process changes, with approximately 299 af of lost production being attributed to participation in the an energy demand response program. The energy demand response program pays approximately \$1,000,000/year for GWRS to reduce energy use during periods of peak electricity demand.

The 80,000 af production target is an estimate production pending startup of the GWRS initial expansion and available water from OCSD. OCWD staff is working closely with McCarthy, the GWRS Initial Expansion project contractor, with commissioning of new process equipment. It is expected that the MF system will be on line in early April with at least 3 RO trains. Staff is expecting to be able to make up for some of the lost production before the end of the 14/15 fiscal year (with the completion of the expansion) with a goal of achieving 80,000 af.

The table below shows the GWRS production trend compared to the planned production of 80,000 af:

The table below shows the rolling average production fiscal year to date:

Subject: GWRS OPERATING BUDGET SUMMARY

SUMMARY

The Joint Exercise of Powers Agreement between OCWD and OCSD governs the operation of the Groundwater Replenishment System (GWRS). This document requires OCWD to prepare and submit its annual operating budget for the GWRS to OCSD.

Attachment(s)

- Water Production Group Work Plan
- FY 2015-16 Department budget

RECOMMENDATION

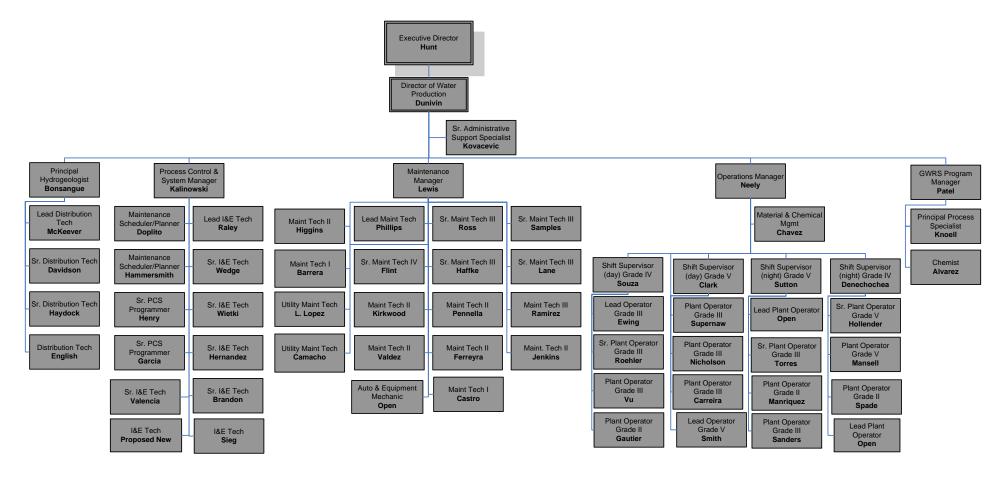

Informational

DISCUSSION/ANALYSIS

The Amended Joint Exercise of Powers Agreement was established to provide details on the obligations of OCWD and OCSD for the operation of the GWRS. As part of this agreement is a requirement to report the OCWD annual budget for operations, maintenance, and capital expenditures for the GWRS to OCSD. A presentation will be given to show details of the GWRS operational budget. In addition, key cost centers and observations on the operational economics will be presented.

Attached to this submittal is a Water Production Group work plan (Attachment A) and a proposed Fiscal Year 15-16 line-item department budget for (Attachment B). This budget will be submitted to the OCWD Board of Directors for its consideration at the April Board meeting.

WATER PRODUCTION/GROUNDWATER REPLENISHMENT SYSTEM

Existing Staff - 64 FTEs

- 1 Executive Director of Operations
- 1 Director of Water Production
- 1 Senior Administrative Support Specialist
- 1 Principal Process Specialist
- 4 Supervisors (Operations Manager, GWRS Program Manager/Process Manager, Process Control & System Manager and Maintenance Manager)
- 20 Operators
- 14 Maintenance Technicians
- 1 Vehicle and Equipment Technician
- 2 Utility Maintenance Technicians
- 2 Maintenance Scheduler/Planners
- 1 Material and Chemical Management Technician
- 8 Instrumentation & Electrical Technicians
- 2 Process Control System Programmers
- 1 Chemist
- 1 Principal Hydrogeologist
- 3 Senior Distribution Technicians
- 1 Distribution Technician

Mission

Operations and maintenance (O&M) of the GWRS Advanced Water Purification Facility (AWPF), Talbert Barrier and Green Acres (GAP)

Key Issues for FY 2015-16

- Maximize operation of GWRS processes:
 - With the GWRS initial expansion complete work with the Orange County Sanitation District to make as much water as possible for GWRS production.
 - Goal for 2015-16 production 103,000 acre feet.
 - Send all non-barrier production to Miraloma and Kraemer/Miller basins.
 - Continue to control or reduce the water treatment unit cost by getting the best possible price on electricity, chemicals and spreading the system's fixed costs over the maximum possible production.
 - Optimize operation of new 15 million gallon flow equalization facilities to maximize GWRS production.
- Reduce GWRS processing costs:
 - Continue optimization of MF backwash and cleaning regimes.

- Optimization of RO cleaning regimes by optimizing clearing chemical concentrations and cleaning intervals.
- Optimization of RO pretreatment chemical program, which includes the use of acid and antiscalant to reduce cost and prevent mineral scaling of membranes in the 3rd stage of RO units.
- Optimize use of new RO energy recovery devices in six new RO units to reduce energy cost and/or balance flux performance.
- With the current success of identifying an antiscalant that helps control mineral scaling, continue pilot research to make the final steps toward RO operations at pH 7. Progress to date has saved approximately \$1,800,000 annually. Adjustment from pH 6.9 to 7.0 would further reduce acid usage potentially saving another \$300,000 annually. At the same time, continue to engage manufacturers to develop and evaluate antiscalant formulations toward this goal.
- Work with purchasing to find and procure the best chemical pricing.
- Energy use reduction, load shifting to less expensive nighttime hours where possible, and participation in demand response programs that offset the cost of electricity.
- In the second year of 5 year energy contract that is helping maintain costs of energy.
- Lifespan extension of both MF and RO membranes.
- Continue efforts to maximize UV lamp life to 12,000 hours.
- Continue to replace older RO membranes in phases and planned approach to maintain water quality with the purchase of 3 sets of 1,050 RO membrane elements.

Manage GWRS assets by:

- Continued implementation of a robust preventative maintenance program using the Maximo computerized maintenance management system (CMMS).
- Staff continues to update GWRS the work plans in the CMMS to reflect knowledge gain with 6 years of experience operating the treatment plant.
- Staff adding all new equipment supplied for the GWRS expansion to the CMMS.
- Continued development of staff capabilities to make both minor and major mechanical and electrical repairs on equipment and facilities.
 These internal capabilities assure fast response, quality repairs and lower cost.

- Begin replacement of original MF membranes in a limited number of cells based on manufacturing availability from Evoqua.
- The new Tekken lime system is being optimized for delivery of noncorrosive water into distribution system by effective lime post treatment with confirmatory testing.
- Protection of injection wells by delivery of low particle water.
- Effectively manage the warranty claims and contractor required repairs for the GWRS initial expansion equipment during the one year warranty period.

Account Information	FY 2013-14 Actual	FY 2014-15 Budget	FY 2015-16 Proposed Budget
Salaries and Benefits	7,903,803	7,326,254	8,812,826
Services and Supplies	15,612,398	17,489,200	19,966,434
Total	\$23,516,201	\$24,815,454	\$28,779,260

I FY 2015-16 Major New Initiatives/Programs

- ♦ Continue to monitor changes in the MF membrane backwash and cleaning intervals to increase process efficiency and production.
- ◆ Evaluate and test current and developmental Evoqua PVDF MF membranes using pilot units.
- ♦ Engage low-pressure membrane manufacturers to initiate evaluations of alternative products capable of successfully operating on AWPF source water and could be retrofitted into existing infrastructure.
- ♦ As the RO membranes age, investigate methods to effectively clean them extend their life to 5 years without reducing salt rejection effectiveness and to control energy use.
- Develop key performance factors that help identify and predict MR and RO membrane end of life conditions.

II Core Activities

- O&M of the 100 mgd GWRS AWPF.
- ♦ O&M of the 102 well Talbert Injection Barrier
- ♦ O&M of the GAP treatment plant.
- ♦ GWRS engineering and research aimed at maintaining and optimizing treatment plant performance, production and the Talbert Barrier.

- Administering the joint OCWD & OCSD GWRS Steering Committee meetings.
- Facilitate monthly OCWD and OCSD Joint Operation Committee meetings.

III Non-Core Activities

- ◆ Participate in technology transfer on advanced treatment with other water districts, consultants, public agencies, and industry organizations.
- ◆ Provide in-kind support as specified by OCWD for participating Water Reuse Research Foundation and Water Research Foundation research projects.
- Provide technical support on various wellhead treatment systems throughout Santa Ana Watershed.
- ◆ Provide technical support as needed to the Water Quality, Engineering, Hydrogeology, Public Relations and Health & Regulatory Departments.
- Provide facility maintenance support for OCWD's Fountain Valley facilities.
- Provide support to set up meetings and events.
- Provide instrumentation and electrical support to OCWD's recharge and Prado operations.
- Provide data collection and monitoring support for the Research & Development Department.
- Provide technical updates and participate in meetings with the GWRS Independent Advisory Panel.
- Provide assistance with GWRS tours for the Publics Affairs Department as necessary.
- Provide any required GWRS technical and operational information for outside data requests.

IV Group Goals for FY 2015-16

GWRS-

- 1. Produce up to 103,000 acre- feet of water for recharge and injection.
- 2. Continue efforts to control net production cost to less than \$500 per acre foot.
- 3. Continued development of the CMMS for the GWRS and update maintenance requirements for existing and new equipment associated with the GWRS Initial Expansion.
- 4. Continued development of databases to help staff monitor the individual process performance of the MF, RO and UV treatment systems.

<u>GWRS Engineering/Research Center</u> –

- 1. Provide bench and pilot scale evaluations of major process changes before implementation in the full scale GWRS.
- 2. Evaluation of the MF and RO operating strategies, cleaning protocols, and chemical usages to increase production, reduce operating cost, and extend asset life.
- 3. Test new MF/UF membranes or systems available in the current market as possible for possible use in existing GWRS or GWRS Final Expansion.
- 4. Evaluate commercially available RO technology and membranes in anticipation of future large-scale replacements.
- Evaluate the impact of feedwater quality on MF and RO membrane performance and Talbert Barrier wells through the operation of various remote membrane/filter monitoring systems and additional water analysis.
- 6. Provide support as needed to the OCWD lab, R&D, and other District departments.
- 7. Support the science, technology and practice of water reuse through providing researchers site access to conduct studies funded by the WateReuse Research Foundation and others.
- 8. Participate in technology transfer initiatives, including serving as project advisors and presenting information at conferences and symposiums.
- Continue collaborations through the Dow Application Center established
 to streamline development and evaluation of the very latest membrane
 chemistries and technologies. Solicit collaborations with other leading
 membrane manufacturers such as CSM and Hydranautics toward the
 same objectives.
- 10. Develop statistical parameters for process control for critical control points in keeping with recommendations from the GWRS Independent Advisory Panel.
- 11. Work with engineering to bring the Mid Basin demonstration project on line.

OCSD -

- Continue with joint operations meetings with OCSD plant operations and source control and OCWD staff to ensure both agencies are knowledgeable of issues with each other's operations.
- 2. Coordinated day to day operation and optimization of the new 15 million gallon volume flow equalization storage tanks.

CDPH and the RWQCB —.

1. Prepare an Annual Report on the GWRS operation with District staff and outside consultant.

2. Assist the District's Health and Regulatory department in amending the current permits to include the Initial Expansion of the GWRS.

Talbert Barrier -

1. In conjunction with the barrier staff continue evaluating the corrosivity and injection well fouling propensity of the GWRS finished product water.

V Pending Activities

Continue to develop staff to effectively operate and maintain the GWRS Initial Expansion Facilities.

VI Staff Addition Needed for FY 2015-16

Add one new I&E technician to provide support for GWRS and Forebay operations to maintain electrical equipment and support control systems.

VII Future Issues

In the next two years, issues the District will need to consider include:

- 1. Optimization of the GWRS AWPF treatment process to lower operational costs, including operation of new flow equalization facilities.
- 2. Continue to optimize MF and RO membrane replacement strategies.
- 3. Process optimization and adjustment of preventative maintenance requirements as necessary.
- 4. Continue forward-looking review of water treatment technologies and opportunities to optimize current GWRS membrane and advanced oxidation treatment processes.
- 5. Continue to monitor energy issues to ensure the lowest possible power expenditures for the GWRS.
- 6. Support the planning, construction, start-up, operation, maintenance and optimization of the District's first mid-basin injection well.

Funding Source: N/A

From: Mike Markus/Jim Herberg Program/Line Item No.: N/A

General Counsel Approval: N/A
Staff Contact: M. Patel Project Report Approved: N/A

CEQA Compliance: N/A

Subject: UPDATE ON THE OCSD FLOW AVAILABILITY

SUMMARY

Orange County Sanitation District (OCSD) is in the process of maximizing flows to Plant No. 1. An update on the flow availability for the GWRS Initial Expansion will be presented by OCSD staff.

RECOMMENDATION

Informational.

DISCUSSION/ANALYSIS

OCSD has seen a decrease in the available sewer flows to their Plant No. 1 facility that feeds GWRS. This decrease is a result of the ongoing drought and increased conservation. In response to the historic low flow observed, OCSD staff has begun to make diversions of sewer collection flows to maximize Plant No. 1 production. This includes operation of the Steve Anderson Lift Station continuously. The GWRS Initial Expansion requires 133 million gallons per day (mgd) of secondary effluent to produce its 100 mgd design capacity. The GWRS Initial Expansion is expected to be complete at the end of June 2015. An update on the projected flow availability to the GWRS Initial Expansion will be presented by OCSD staff.

PRIOR BOARD/COMMITTEE ACTIONS

9/07/11, R11-9-128 Contract GWRS-2011-1, GWRS Initial Expansion Award Contract to McCarthy Builder Inc.

Subject: QUARTERLY OUTREACH REPORT [JANUARY-MARCH 2015]

SUMMARY

Outreach for OCWD projects and the GWRS continues with a major focus to build and maintain support, as well as field media interest and media coverage. The following is a report of activities from January through March 2015.

RECOMMENDATION

Informational

DISCUSSION/ANALYSIS

Tour Update

From January through March 2015, OCWD conducted 40 tours for nearly 843 guests. Below is a monthly breakdown that shows the number of tours and guests:

Month	onth # of Tours							
January	14	279						
February	15	236						
March	11	328						

Following is a list of groups that toured the GWRS during this period:

- Two groups of students from Dana Hills High School
- Community members who composed three public tour groups
- Students from Chavez High School in association with Orange County Coastkeeper
- Representatives from the State Water Resources Control Board (DDW Operator Certification)
- Members of Shepherd's Grove Men's Group Ministry
- Students from Cal Poly Pomona
- Representatives from the San Francisco Public Utilities Commission and Brown & Caldwell
- Representatives from Aquaback Technologies, Inc.

- General Electric Water & Power representatives
- Members of the City of Oceanside's Utilities Commission and the Water Utilities Director
- Students from Orange High School in association with Orange County Coastkeeper
- Executive staff from Oakland Energy & Water Ventures
- Students from the Port of Los Angeles High School
- Students from the University of Southern California's sustainability class
- Students from San Bernardino Valley College
- Students from Godinez High School
- Representatives from the Association of California Cities, Orange County
- Directors Green, Anthony and Reyna along with Jason Dadakis and Mike Markus gave a briefing and tour to Environmental Protection Agency (EPA) Director of the Office of Ground Water and Drinking Water Peter Grevatt. Before coming to Fountain Valley for the GWRS tour, Peter was given a tour of the Prado Wetlands and Forebay.
- Students from West Coast University
- Representatives from Padre Dam Municipal Water District
- Students from Edison High School
- Students from Shibaura Institute in Japan, in association with UCI
- Two groups of nursing students from California State University, Fullerton (CSUF)
- Students from Huntington Beach High School
- Health science students from CSUF
- Students from CSUF's extended education program
- Nursing students from West Coast University
- Students from El Modena High School
- Nursing students from CSUF
- Students from a sustainability class at California State University, Long Beach.
- John Kennedy provided a briefing and tour to the Chief Administrative Officer of San Jose Water.
- UCI American Academy of Environmental Engineers
- Engineers from La Paz, Mexico, in Association with SAWPA

Upcoming Tours:

- CSUF, April 16 & 22
- Pomona College, April 21
- Vanguard University, April 24
- Public Tour, May 1
- CSUF, May 6 & 7
- California State University, Long Beach, May 12
- Godinez High School, June 2

Speakers Bureau:

(Note: The GWRS is mentioned in all OCWD speakers bureau presentations.)

- Director Phil Anthony presented to members of the Cypress Rotary about OCWD, its projects and its groundwater cleanup efforts.
- Director Harry Sidhu and Principal Hydrogeologist Dave Mark gave a presentation to members of the Anaheim Rotary about OCWD and its groundwater cleanup projects.
- Director Denis Bilodeau participated in a water bond panel discussion hosted by the American Council of Engineering Companies, Orange County Chapter.
- Director Vincent Sarmiento, General Manager Mike Markus and Principal Hydrogeologist David Bolin presented to the Delhi Neighborhood Association in Santa Ana about OCWD and its groundwater cleanup projects.
- Executive Director of Planning & Natural Resources Greg Woodside provided a presentation about the District and its projects to the Orange County Association of Environmental Professionals.
- GWRS Program Manager Mehul Patel gave a presentation about the Groundwater Replenishment System at a municipal water technology workshop hosted by the Government Accountability Office.
- Director of Public Affairs Eleanor Torres provided a presentation to Mesa Water District's Water Issues Study Group.
- Executive Director of Local Resources & Engineering John Kennedy gave a
 presentation at the Annual Conference of AGWA-AGWT about managing the basin
 and developing new local water supplies.
- GWRS Program Manager Mehul Patel provided an Annual Water Treatment Seminar at AWWA's conference in Arizona.
- President Cathy Green provided a presentation to the Huntington Beach Coordinating Council about Orange County's groundwater supplies and challenges.
- President Cathy Green provided a presentation at the Industrial Environmental Coalition of Orange County's water conference luncheon about the drought and water supply.
- Mike Markus gave a presentation to the YLWD Board of Directors regarding the groundwater contamination projects.

Upcoming Speakers Bureau:

- Nellie Gayle Gardeners, April 14
- Anaheim Caravan, April 17
- St. Paul's Lutheran School, April 22
- ASCE Conference, May 21
- Kiwanis Club of La Palma, May 21

Media:

- A video about the GWRS, produced by Buzzfeed, is trending on YouTube and there
 are more than 1.5 million views: https://www.youtube.com/watch?v=p-f F3tE9rA.

 Buzzfeed.com interviewed GWRS Program Manager Mehul Patel and later filmed a
 blind taste test of its employees sampling three types of water: tap water, Fiji water
 and GWRS water.
- A production crew from Brazil's TV Globo interviewed Mike Markus in February and captured footage of the Groundwater Replenishment System and recharge basins in

- Anaheim. The footage will be used for a future global segment about solutions to combat drought.
- President Cathy Green was interviewed by a reporter from CBS2 about the GWRS
 Initial Expansion on February 24. The segment aired that day during the CBS2 news
 at 6 p.m. and the KCAL9 news at 8:30 p.m.
- On February 25, Cinco Dias, a Spanish business and finance newspaper, published an article about water purification technology and referenced water reuse projects throughout the world. The article contains a few paragraphs about the GWRS and Mehul Patel is quoted. Here is a link to the full story: http://cincodias.com/cincodias/2015/02/25/empresas/1424890925_662451.html.
- On February 26, Mehul Patel was interviewed by a reporter from Saigon TV about the GWRS: https://youtu.be/3zkk5x-H1oY.
- Bill Dunivin was interviewed about the GWRS by a writer from Treatment Plant
 Operator. A resulting article was published titled, "A California Water District
 Succeeds with Indirect Reuse of Recycled Wastewater":
 http://www.tpomag.com/editorial/2015/03/a california succeeds with indirect reuse
 of recycled wastewater.
- The Groundwater Replenishment System was referenced in this article: http://www.utsandiego.com/news/2015/mar/11/padre-dam-water-purification-plant-ready-to-open/.
- The GWRS Initial Expansion was mentioned in this article: http://www.virtual-strategy.com/2015/03/11/el-ni%C3%B1o-weak-drought-deepens-orange-county-calif-water-recycling-advances-increasingly-im#axzz3UCgz4baW.
- OCWD and the GWRS were mentioned in an online article published by Sustainable Cities Collective titled, "Managing Water During Dry Times in Inland Empire, California:" http://bit.ly/1CCMHM3
- Perkin Elmer published a case story and an article about the GWRS: http://bit.ly/19E0jtY; http://bit.ly/198bwlf.

Other:

• On January 20, a press release was distributed about the SCE grant award the District received for the GWRS Initial Expansion: http://bit.ly/1CKrZ8g.
